

A Focus on High Performance

HexaLux™ Exam Light

Brilliant. Powerful, Next-Generation LED Exam Light.

Experience the clear difference in coolness, comfort and natural color rendition inherent in pure, white LED light in your exam room. One light. Many possibilities.

Configured for Unlimited Clinical Applications

Its versatility in design includes five light intensity levels and configurations that mount to the ceiling, wall, rail or mobile unit. It's ideal for a multitude of rooms including exam room, birthing suite, or ICU.

Sterilizable, Centrally Controlled Removable Handle

For simplified use by staff, all features are directly controlled from a central handle, which can be sterilized for use in minor surgical procedures.

- Turn light on or off
- Adjust light intensity
- Adjust light spot size

Further Customize Through Accessories

A convenient **shelf and basket** can be used for patient records, accessories, dressings, etc.

An optional **retractable power cord** eliminates cables on the floor.

Built to Last. And Last.

The trifecta has been accomplished; a **powerful**, high R9 value of 97, with a 65,000 Lux and long-lasting bulb life of up to 50,000 hours. With 16 LEDs its output provides an unmatched light source at a **competitive, affordable price**.

Easy Installation in Any Room Design

The modular design and partial assembly of the unit when it arrives, makes for quick installation and less room downtime.

Flexibility in mounting and location within the room allow for Customer Adaptability

Technical Specifications

Features	HexaLux™ Exam Light
Light Intensity	Up to 65,000 Lux
Pattern Size	5.5" to 8.1" (14.0 to 20.5 cm)
Color Temperature	4,400 K (+/- 6%)
CRI (Color rendering index)	95 (+/- 6%)
R9	97 (+/- 6%)
Average LED Bulb Life	50,000 Hours

Mobile Stand
* Available with or without battery backup option

APPLICATION

The HexaLux Examination Light, available in three configurations, is suitable for a broad range of applications including:

- Examination rooms
- Emergency rooms
- Plaster rooms
- Intensive Care Units
- Resuscitation units
- Suture rooms
- Induction and recovery rooms
- Neonatal units
- Pediatric department
- Maternity ward
- Morgue

The HexaLux Examination Light is intended for diagnostics offering variable field diameter and intensity, providing healthcare facilities staff with effective lighting for examination, treatment and emergency areas. The HexaLux Examination Light should only be used by qualified staff authorized to work in the healthcare facilities (hospitals, clinics).

This examination light shall be operated in a controlled environment by a professional familiar with appropriate techniques for such equipment. The HexaLux Examination Light is designed for examination rooms, emergency rooms, maternity wards, intensive care units, recovery rooms and all other diagnostic applications. The HexaLux Examination Light is a Class I medical device and is registered with French National Agency for Medicines and Health Product Safety (ANSM).

DESCRIPTION

The HexaLux Examination Light has an examination light range of approximately 10,000-65,000 Lux providing illumination suitable for examination, treatment and emergency procedures. The lighthouse provides pure white and cool light.

The HexaLux Examination Light is available in three configurations to meet the needs of a wide variety of applications ranging from simple examinations to emergency procedures such as suturing, etc. Available configurations include ceiling mounted system, wall mounted system and mobile stand.

The lighthouse features can be directly controlled by rotating the sterilizable handle, turning the light on and off, adjusting the light intensity and the illumination pattern size.

(Typical only - some details may vary.)

STANDARDS

The range of the HexaLux Examination Light has been designed in compliance with international medical electrical equipment regulations:

- CE marking according to EEC Directive 93/42
- UL marking medical equipment, with respect to electrical shock, fire and mechanical hazards only in accordance with:
 - » ANSI/AAMI ES60601-1 (2005) + AMD1 (2012)
 - » CAN/CSA-C22-2 NO. 60601-1 (2014)
 - » IEC 60601-1 (EN 60601-1)
 - » IEC 60601-2-41 (EN 60601-2-41)
 - » IEC 60601-1-2 (EN 60601-1-2)
 - » IEC 60601-1-6 (EN 60601-1-6)

FEATURES

The complete range of the examination light provides color-corrected, natural appearing white light with a color rendering index (CRI) of 95 (±6%), a rendering index of red tones (R9) of 97 (±6%), a rendering index of white tones (R13) of 97 (±6%) and a color temperature of 4,400 (±6%) Kelvin. The features of the HexaLux Examination Light are controlled directly at the sterilizable central handle: turning the light on or off, adjusting the illumination intensity and pattern size are managed by rotating the central handle. All lighthouses dissipate heat away from the examination field for patient safety and healthcare team comfort.

Item _____
 Location(s) _____

The single cardanic allows an adjustable pattern of light. The operator adjusts the pattern size by rotating the sterilizable lighthandle. The pattern sizes for the HexaLux Examination Light are adjustable from a diameter of 6.3" (16 cm)/5.5" (14 cm) to a diameter of 8" (20.5 cm)/7" (18 cm), measurements respectively realized at 1.0 and 0.85 meter. Illumination intensity can be adjusted from 10,000 ($\pm 10\%$) Lux/12,500 ($\pm 10\%$) Lux up to 50,000 ($\pm 10\%$) Lux/65,000 ($\pm 10\%$) Lux, measurements respectively realized at 1.0 and 0.85 meter. The lighthouse has a span of 11.8" (30.5 cm) and contains 16 LEDs. The power consumption is 24 Watts and the life of the light diodes (at least 50,000 hours) ensure low operating costs by daily use of the light. In addition to the central handle to control and manipulate the lighthouse, the lighthouse includes two side handles providing a secure and comfortable grip. The lighthouse yoke allows a 360° rotation.

HexaLux Examination Light is available in three configurations, ceiling mounted, wall mounted and mobile stand:

Ceiling-mounted configuration is suspended on a vertical tube. The horizontal extension arm slips onto the lower end of the vertical tube and is secured by an external retaining ring. The upper end of the vertical tube is secured by set of heavy-duty setscrews to a ceiling plate. A canopy is furnished to conceal the mounting plate and power supply. The vertical tube may be cut to length to suit various ceiling heights. STERIS recommends a minimum ceiling height of 93.8" (2,382 mm) to maximum ceiling height of 122.6" (3,114 mm). The ceiling-mounted unit is equipped with a single 31.5" (800 mm) horizontal extension arm supporting a spring arm of 28.3" (720 mm) attaching the examination lighthouse. This allows for an approximate 69" (1,752 mm) radial coverage area. The total weight of the ceiling-mounted configuration is 26.5 lb (12 kg). Torque 54.9 ft•lb/74.5 N•m.

Wall-mounted configuration is furnished with the same horizontal extension arm and spring arm used on the ceiling-mounted configuration. When not in use, the lighthouse can be folded close to the wall to optimize space in the examination area. The total weight of the wall-mounted configuration is 19.4 lb (8.8 kg). Torque is 59.9 ft•lb/81.2 N•m.

Mobile stand enables ambulatory use and is suitable for various applications. The mobile stand is available with an optional built-in battery. Both bases, with or without battery, have the same size – diameter of 24" (610 mm) and includes the base, vertical support tube, spring arm and lighthouse. The system is supported by a small footprint and stable base with five lockable castors. The mobile stand height is 69" (1,753 mm). Both mobile stands, with or without battery option, include a power cord compliant to the selected country requirement. The mast has a support to store the power cord. The total weight of the mobile stand without batteries is 52.3 lb (23.7 kg) and is 56.3 lb (25.6 kg) for the mobile stand with batteries. Torque is 59•9 ft•lb/81.2 N•m.

All configurations are delivered in a 41 x 31 x 9" (1040 x 800 x 240 mm) box.

CONSTRUCTION

The lighthead is constructed of lightweight and durable materials. The aluminum foundry cover offers excellent maneuverability and heat conduction. The lighthead optical system consists of multiple Light Emitting Diode (LED) light sources and optics.

OPTIONS

Mobile stand:

- Retractable power cord reel
- Batteries provide up to 6.5 hours of use during power outages
- Shelf
- Basket

120V

SUPPORT STRUCTURE

The ceiling and wall structure, installed by a third party prior to installing the examination light, must be level and must adequately support the examination lighting system configuration to be installed. Consult the equipment drawings for further details.

INSTALLATION

Installation and integration operations of the ceiling-mounted and wall-mounted systems should only be assigned to STERIS technicians or qualified technicians. For further information, refer to the equipment drawings.

Assembling the mobile stands can be done by users. Please refer to the mobile stand assembly instructions and equipment drawings.

STANDARD ACCESSORIES

The sterilizable handle is made of polyphenylsulfone (PPSU) and can be sterilized (refer to the user manual for sterilization instruction and compliance with national regulations for different countries).

UTILITY REQUIREMENTS

Electricity – The system is compatible with the following ratings:

- 100-240 Vac 50/60Hz (except for mobile stand with batteries: 50-60 Hz)
- 1-phase max. 104 VA (for mobile stand standard version)
- 1-phase max. 90 VA (for mobile stand with batteries)

Fuse accessible to operator:

- Mobile standard version: 2xT2.5A 250V PC1500A
- Mobile version with batteries: 2xT2.5A 250V PC1500A (mains)1x2.5A 250V PC1500A (batteries)

PREVENTIVE MAINTENANCE

A global network of skilled service specialists can provide periodic inspections and adjustments to help ensure low-cost peak performance. STERIS representatives can provide information regarding annual maintenance agreements.

CUSTOMER IS RESPONSIBLE FOR COMPLIANCE WITH APPLICABLE LOCAL AND NATIONAL CODES AND REGULATIONS.

PRIMUS OPERATING TABLE
The best choice for cranial surgery

[Home \(/\)](#) / [Operating tables \(/operating-tables/\)](#)
/ [Operating tables PRIMUS \(/operating-tables/operating-tables-primus/\)](#)

PRIMUS is at the top of its class

Just like FOCUS (/), PRIMUS offers you maximum legroom, 270-degree access and the perfect distance to the head of the patient. The patient surface of the PRIMUS is equipped with a lateral tilting function. With this feature, you have increased access possibilities for special positions.

The dual telescopic column allows for the lowest patient ingress height on the market! This means that even patients with restricted mobility can get onto the table easily. The high maximum setting is particularly useful for procedures in which the surgeon has to work in a standing position. With PRIMUS, you can stay focused and relaxed during the entire procedure!

The excellent and smooth mobility of your FOCUS operating table makes changing patients between procedures safe and easy. Combine optimised procedures with economic efficiency.

Advantages of the PRIMUS at a glance

- ✓ Clean and sturdy hygienic stainless steel construction
- ✓ Perfect working angle due to lateral tilting function of the patient surface
- ✓ Working height adjustable with dual telescopic column
- ✓ Using the memory function with 8 programmes, your patient positions are available at the push of a button
- ✓ Perfect patient head position at all times with the patented telescopic head section and horseshoe-shaped headrest for the best possible access
- ✓ Smooth lever and steering castor undercarriage for maximum mobility in the operating room.
- ✓ Powerful 24V DC battery for cordless use
- ✓ For tall patients, the length of the operating table can be adapted using the back section extension

Highly impressive standard equipment

The brumaba PRIMUS offers you a wealth of highly modern features. These features bring about countless tangible advantages for your practice. The most important benefits at a glance:

- ✚ Telescopic column, adjustable from 520 - 950mm
- ✚ Lateral tilting
- ✚ Memory function with 8 programmes
- ✚ Telescopic head section with horseshoe-shaped headrest
- ✚ Lever and steering castor undercarriage
- ✚ 24V DC battery pack operation
- ✚ Remote control
- ✚ Back section extension for length adjustment
- ✚ Stainless steel construction
- ✚ Fixed base plate L 760 mm, W 430 mm

Optional:

- ✚ 2 GUIDE DRIVE "OR" PRIMUS undercarriage (L 895mm, W 508 mm, wheels 120 mm and 80 mm)

- ✚ 4 EASY DRIVE PRIMUS undercarriage (L 905 mm, W 600, wheels 120 mm)

Overview of central performance parameters

Total length	1.770 mm - 1.940 mm
Total width	555 mm
Net weight	175 kg (+ 10,60 kg Polster)
Max. table load	300 kg
Max. head section load	100 kg
Max. foot section load	150 kg
Adjustment range	
Height	520 - 950 mm
Head section tilting angle	-45° to +35°
Back section tilting angle	-04° to +62°
Seat section tilting angle	-10° to +40°
Foot section tilting angle	-90° to +30°
Axial tilting angle	-17° to +17°
Electrical characteristics	
Operating voltage	24V DC
Class of protection	IP X 4
Battery capacity	22 Ah
Operating time	
when fully charged	1-2 weeks

Exactly the accessories you need

To suit your individual surgical needs, you can combine your PRIMUS with many useful accessory modules. These include the following options:

- ♥ Accessories storage
- ♥ Anaesthetan supporting and tubeholders
- ♥ Arm section
- ♥ Armrests
- ♥ Back section extensions
- ♥ Battery, batterywagon and charger
- ♥ Cover and hygiene
- ♥ External side mounting (for x-ray)
- ♥ Footswitches
- ♥ Hand tables
- ♥ Head region
- ♥ Headplates
- ♥ Holders for remote control
- ♥ Infusion stand
- ♥ Instruments tables
- ♥ Mayfield extensions
- ♥ Mounting bracket
- ♥ Mounting brackets
- ♥ Padding
- ♥ Paper towel holders
- ♥ Push handles
- ♥ Side gates

- ▼ Side supports
- ▼ Slabs extensions
- ▼ Supports
- ▼ Supports in head region

ICS 1

Ceiling Rail System for Gravity Infusion

Ceiling Rail Straight

+ compact, light and optical appealing profile

Material	aluminium, anodized
Profile size	25 × 25 × 2,25 mm
Length	user-defined by use of connectors (max. 4.000 mm one-piece)
Load capacity	50,0 kg / m
Weight	appr. 0,5 kg / m

D1AA0013	standard length 1.000 mm
D1AA0013-X	special lengths available on request

Ceiling Rail U-Form

Material	aluminium, anodized
Profile size	25 × 25 × 2,25 mm
U-Size	appr. 2.011 × 822 mm, with 3 connectors and 2 end pieces
Weight	appr. 2,6 kg

D3FB0013	standard size
D3FB0013-X	special sizes available on request

! Instructions for installation please see p. 192

End Piece

as end lock for the rail system

Material aluminium

Weight 0,01 kg

Z2N07002

D-Cut

to insert the sliding hook even when the rail finishes directly at the wall

Z2N07082

! for security reasons an end piece is requested in front of the D-cut

Connector

to connect two ceiling rails

Material stainless steel

Weight 0,03 kg

Z2N07012

Include a minimum of 2 End Pieces for each treatment room receiving IV Hanger

Ceiling Infusion Systems

! When assembling the rail below suspended ceilings, we recommend to use the provita substructure.

Verify Existing Structure and new ceiling height to determine which mounting spacers Owner is to order for installation

The four part U-shaped rail system must be fastened in seven different places by substructure spacers. The order of the spacers should comply with the layout shown in the sketch - each of them 90° turned to the next one – so that a strong construction will be given in all directions. An essential requirement for security and optimal functionality of our rails is the proper and professional assembly of the spacers and rails.

Substructure spacers for distance 200 to 500 mm – Version C

	distance	weight
Z2S07066	200 mm	appr. 0,32 kg
Z2S07076	250 mm	appr. 0,38 kg
Z2S07086	300 mm	appr. 0,44 kg
Z2S07096	350 mm	appr. 0,51 kg
Z2S07106	400 mm	appr. 0,56 kg
Z2S07116	450 mm	appr. 0,62 kg
Z2S07126	500 mm	appr. 0,69 kg

Substructure spacers for distance 500 to 1.000 mm – Version D

	distance	weight
Z2S07456	500 – 600 mm	appr. 1,6 kg
Z2S07466	600 – 700 mm	appr. 1,9 kg
Z2S07476	700 – 800 mm	appr. 2,2 kg
Z2S07486	800 – 900 mm	appr. 2,5 kg
Z2S07496	900 – 1.000 mm	appr. 2,8 kg
on request	> 1.000 mm	

Installation instruction

The rails are mounted to the connectors, though fastening at any other point is also possible. The pre-drilled holes in the connectors can be used as a drilling template for the rails. This guarantees an exact fit of the rails, spacers and raw ceiling. The spacers' slots can be used for both, even out irregularities during dowelling as well as in the building's ceiling. Maximum horizontal distance between 2 spacers: appr. 70 cm. The substructure spacer Version C is suitable for an intermediate ceiling up to 50 cm. While Version D can be used for intermediate ceiling higher than 50 cm.

The ceiling rails can be mounted directly to the ceiling or support structure, using the corresponding fastening materials. However, a spacer is needed for suspended ceilings. The spacers are made of galvanized steel and easy to install. They are anchored in the building's ceiling and bridge the gap between concrete and suspended ceiling, thus guaranteeing a sturdy substructure. Please specify the exact dimensions between the concrete and suspended ceiling with your inquiry or order.

Ceiling IV-Pole

Series I1001 / I1021

+ easy and safe adjustable by single-handed safety adjustment

Material	stainless steel
Tube diameter	18 / 14 mm
Bottle holder	stainless steel 4 safety hooks

CHROME STOOLS

MODELS 1250,1251 FOOT STOOLS are constructed of chrome and have 17 weld points to enhance strength and durability. These stools feature a non-slip rubber mat and rubber tips for added comfort.

Model 1251 adds a handrail, which measures 35-3/4" from the floor.

Model No.	Part No.	Dimensions	Ship Wt. (lb) est.
1250	1021251640	11-3/8"D 14-1/4"W 9"H	8
1251 (with handrail)	1011251000	11-3/8"D 14-1/4"W 9"H, (35-3/4"HR)	10
651 (handrail only)	7900651000	35-3/4"H	4

Option: Handrail attachment

STAINLESS STEEL STOOLS

MODEL 1260SS FOOT STOOL is constructed of stainless steel and also has 17 weld points to enhance strength and durability and features a non-slip rubber mat and rubber tips for added comfort.

Model No.	Part No.	Dimensions	Ship Wt. (lb) est.
1260SS	1011260000	11-3/8"D 14-1/4"W 9"H	10

MODELS 7757MR, 7761MR (KENT) FOOT STOOLS are the industry standard. Fully-welded, stainless-steel construction. Offered in two sizes. Add the **optional handrail to 41" height - Model 7757MR-HR.**

Model No.	Part No.	Dimensions	Ship Wt. (lb) est.
7757MR	1017757000	12"D 18"W 8"H	9
7757MR-HR	1017757100	12"D 18"W 8"H, (41"HR)	22
7761MR	1017761000	12"D 30"W 8"H	19
7761MR-HR	1017761100	12"D 30"W 8"H, (41" HR)	32

Note: HR denotes handrail.

UTILITY TABLE (MODEL 7852SS Allen Model)

UTILITY TABLE (MODEL 7852SS Allen Model) is an all-purpose table that offers two solid shelves and a continuous guardrail welded onto the legs on all four sides to protect supplies and equipment. Travels easily on 3" casters.

Model No.	Part No.	Dimensions (Overall)	Est. Ship Wt. (lb.)
7852SS	0257852000	20" x 16" x 34"	46

Options: Glides, crutch tips, larger diameter casters.

UTILITY TABLE (MODEL 7856SS Crescent Models)

UTILITY TABLE (MODEL 7856SS Crescent Models) is a combination utility-work table, which provides a large work surface and storage in two four-inch deep drawers housed below the work surface. A continuous guardrail on three sides protects contents. Travels easily on three-inch casters.

Model No.	Part No.	Dimensions (Overall)	Est. Ship Wt. (lb.)
7856SS (with H-brace)	0317856000	36" x 20" x 34"	78
7856SH (with shelf)	0317856003	36" x 20" x 34"	81

Options: Glides, crutch tips, larger diameter casters.

ADJUSTABLE HEIGHT INSTRUMENT TABLES (Georgetown Models)

ADJUSTABLE HEIGHT INSTRUMENT TABLES (Georgetown Models) are popular in the OR and are designed to straddle the OR table, and offer 20 inches of travel to accommodate changes in table position during neuro, cardiac and orthopedic surgery. When used in general surgery, the table can be adjusted to accommodate the varying heights of personnel. This model can be adjusted manually from either side with a detachable crank handle. Tables travel easily on four three-inch casters, two casters with brakes.

SIM90 Signage Integration Mount

- Complete, fully integrated, all-in-one mounting system includes all components for installing large display digital signage solutions
- Simplifies digital signage installation with preassembled components; no need for additional equipment
- Flexible deployment options to accommodate your digital signage messaging and space requirements; portrait-to-landscape orientation, scalable for future hardware refreshes
- Easy, do-it-yourself portrait or landscape adjustment—no need to reinstall display; knobs are available for locking tilt orientation in place
- Security fasteners deter theft to protect your investment
- Cable management system conceals and organize cables

COMPLETE INTEGRATED ALL-IN-ONE MOUNTING SYSTEM FOR DIGITAL SIGNAGE

Give your digital signage a new point of view with Ergotron's SIM90 Signage Integration Mount. Featuring effortless portrait-to-landscape rotation (no need to reinstall display), this low-profile, fully integrated, all-in-one wall mounting system offers flexible deployment options to accommodate diverse digital signage messaging and space requirements. Preassembled components simplify installation of 32" or larger displays. Scalable for future hardware refreshes, this sturdy and stable mount offers 0° to 15° tilt forward.

SIM90 Signage Integration Mount

E132 2/4

- Easily rotate display to either a portrait or landscape orientation without removing the display
- Portrait or landscape orientation may be dependant on content software or graphic card capabilities
- Complete wall mount solution for digital signage applications
- Easily attaches VESA-compliant (75/100 mm) mini PC to the underside CPU: CPU must have either 75 x 75 mm or 100 x 100 mm mounting holes on one side
- Power brick maximum weight 3 lbs (1,4 kg). Can also hold smaller DVD players or wireless extenders that are VESA compatible
- Mounting options: includes hardware for mounting to wood studs (16" centered studs) or concrete wall surfaces
- Mounting hole patterns: horizontal measurement 200 mm, 300 mm, 400 mm, 440 mm, 500 mm or 600 mm. Vertical measurement 200 mm or 400 mm.
- Display can be positioned at different points on the wall bracket; this lateral shift of the display's position relative to the wall studs can be as much as 5.7" (14.5 cm)
- Profile off the wall: 4.8" (12 cm)

Part # (color)	60-600-009 (black)
Includes	Wall and display brackets, quick-release VESA-CPU mount/power brick bracket, hardware fastener kit
Typical LCD Size	≥ 32" Ideal for 32" and larger displays up to 105 lbs (47,6 kg). Total weight capacity is 115 lbs (52,2 kg): 105 lbs (47,6 kg) for display, 7 lbs (3,2 kg) for CPU, 3 lbs (1,4 kg) for cables and power brick
Compatible Mini PCs	VESA compliant 75 x 75 or 100 x 100 mm Maximum CPU size 13.5"W x 10"H x 2.6"D (34,3 x 25,4 x 6,6 cm), up to 7 lbs (3,2 kg)
LCD SIZE IS APPROXIMATION. DIMENSION IS DIAGONAL MEASUREMENT OF SCREEN. LCD SIZE MAY BE EXCEEDED AS LONG AS SCREEN WEIGHT DOES NOT EXCEED MAXIMUM WEIGHT CAPACITY OF THE MOUNT.	
Weight Capacity	≤ 105 lbs (47,6 kg)
Tilt	15° Smooth continuous display tilt range from 0° to 15° forward; tilt range may be restricted when displays are in portrait mode
Rotation	90°
VESA	MIS-F (see website)
Shipping Weight	24 lbs (11 kg)
Shipping Dimensions	13.25"W x 12"H x 28.5"D (33,7 x 30,5 x 72,4 cm)
Warranty	5 years

INCLUDES SCREWS TO SECURE DISPLAY FOR THEFT DETERRENCE

SIM90 Signage Integration Mount

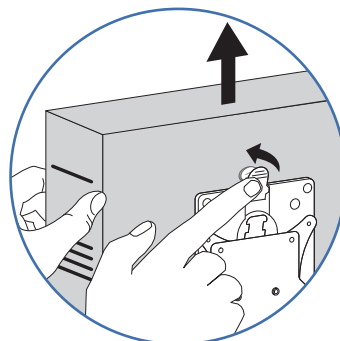

Dimensions

Maximum CPU Dimensions

$\leq 10''$ (254 mm)
 $\leq 2.6''$ (66 mm)
 $\leq 13.5''$ (343 mm)

CPU must be a VESA compliant Thin Client CPU.

Quick Release bracket for easy CPU attachment and removal. (Can be disabled for theft deterrence.)

Weight Capacity

Range of Motion

Compact and flexible

Philips IntelliVue MP5 patient monitor

The IntelliVue MP5 patient monitor delivers IntelliVue monitoring power and functionality in a compact and rugged housing to match the demands of a wide range of care environments both in and out of hospital. Used with the optional IntelliVue Guardian Early Warning Score (EWS), the MP5 is designed to aid caregivers on the general floor in early recognition of subtle signs of patient deterioration. Each member of the IntelliVue family of networked patient monitors gives care teams clear information to assess patients and make diagnostic decisions with confidence. All share an intuitive interface, innovative Clinical Decision Support tools, and outstanding design.

Key advantages

- Compact, rugged housing to meet the demands of transport in and out of the hospital
- Intuitive touchscreen and exceptional ease of use, with outstanding measurements
- Wired and wireless connectivity, and expanded capabilities for care

Medical Device Depot Inc.

www.medicaldevicedepot.com

1-877-646-3300

PHILIPS

Advanced features for ease of use

The MP5 features an intuitive touchscreen and is easy to use, with excellent measurements, clear display, touchscreen operation, and one-step smart touch commands to allow you to focus on the patient, not the monitor. Clinical Decision Support tools such as Horizon Trends, ST Map and ProtocolWatch reveal more information when it counts. The IntelliVue Guardian EWS monitors vital signs and calculates an Early Warning Score fast and easily, aiding in early recognition of subtle signs of patient deterioration.

We've redesigned the user interface to improve visibility of patient data, make it easier to use, and to enhance compatibility with standard software.

Capture and review diagnostic 12-lead ECGs at the monitor before sending them to the IntelliVue Information Center (PIIC). Print cardiograph-type, diagnostic 12-lead ECG reports from the bedside. With the IntelliVue Information Center iX (PIIC iX) review 12-lead interpretation and previous 12-lead ECGs directly at the bedside and trigger 12-lead export to an ECG archive. Each NBP measurement now generates a column in the vital signs trend table. Measurements for

other values are added to provide a comprehensive vital signs data set for the NBP measurement time.

The Smart Alarm Delay¹ algorithm helps reduce the number of pulse oximetry nuisance alarms, allowing you to focus your attention where needed.

Wired and wireless networking for continuous connection

The IntelliVue MP5 connects to the IntelliVue Clinical Network, which can span the hospital enterprise. You can manage your patient's care with the confidence that data collection won't be disrupted, no matter where patients are located on the network.

Expanded capabilities

Enhance the compact IntelliVue MP5 by connecting it to a large display solution with optional IntelliVue XDS software, adding a high-resolution bedside display to clearly see vital patient information at a distance. XDS remote-control functionality gives you the flexibility to access and control the IntelliVue MP5 to enhance your workspace ergonomics. To support clinical workflow efficiency you can print locally from the IntelliVue MP5 monitor.

1. May not be available in all geographies.

Commonly required measurements, built in

- ECG, SpO₂, and NBP available as standard.
- Choice of up to two invasive pressures and temperatures (with an optional port for Welch Allyn SureTemp).

Comprehensive CO₂/gas monitoring

- Choice of mainstream, sidestream or Microstream CO₂.
- Anesthesia monitoring with IntelliVue G1 anesthetic gas modules.

Wired and wireless connectivity with easy switching between modes.

Dynamic Wave area features waves that automatically adjust in size depending on the number of waves configured.

Sturdy housing (Class 7M3) to withstand rough handling.

Comfortable handle and bedrail mount for transport.

Touchscreen operation designed for easy information input and intuitive onscreen navigation with one-touch commands.

Telemetry as a parameter (TAAP) and wireless telemetry as a parameter (WTAAP) display telemetry data through a direct or wireless connection to a telemetry transceiver. Wireless telemetry expands capabilities to provide untethered in-room access to telemetry data in near-realtime.

Video out allows use of larger external display.

Optional integral recorder with 5cm (2") strip offers convenient documentation when needed.

Up to four hours battery operation with one lithium ion battery.²

Optional Early Warning Scoring supports your rapid response program in early identification of deteriorating patients.

Lightweight at approximately 4kg (8.8lbs.) including battery.

A range of screen configurations are included. No user setup required for typical use.

21.3cm (8.4") color SVGA display with up to **4 waveforms** is bright and easy to read.

Optional USB for barcode scanner.

2. With basic monitoring configuration (automatic brightness reduction, ECG/RESP and SpO₂ measurements in use, NBP every 15 minutes).

Clear confidence, in or out of the hospital

Optional bed rail hanger fits securely and provides a good viewing angle.

Philips offers a wide range of supplies, including NIBP cuffs, SpO₂ sensors, Microstream CO₂ accessories and a variety of cables and leads.

IntelliVue MP5 and a large display solution with Philips IntelliVue XDS software.

4-Leg IV Stands Come in Chrome or Stainless Steel

CHROME STANDS

MODEL 1305 IV STAND is for value-conscious customers who will still demand quality construction. The stand is offered with two hooks welded to the pole or a removable four-hook ram's horn with colored secure-grip tips. Both sit on a four-leg epoxy-coated base with Wall Saver™ tips to protect walls. Twist-lock height adjustment. Stand travels on four, 2" twin-wheel hooded casters. Minimal assembly required.

Model No.	Part No.	Feature	Height Adjustment	Ship Wt. (lb) est.
1305	0561305000	welded hooks (2)	47-1/2" to 85-1/2"	10
1305-4P	0561305401	removable hooks (4)	52" to 91"	15

MODEL 1310 IV STAND sits on a 22" diameter chrome-plated heavy bar steel base with Wall Savers™ to protect against scuff marks. The Tru-Loc™ friction knob assures secure height positioning. Offered with a two-hook ram's horn with secure-grip tips. The stand travels on four, 2" twin-wheel hooded casters. Height adjustment from 51-1/2" to 93". Minimal assembly required.

Model No.	Part No.	Feature	Height Adjustment	Ship Wt. (lb) est.
1310	0561310000	(2-hook)	51-1/2" to 93"	14

Optional four-hook adapters available.

RAISING THE BAR FOR EXCELLENCE

i3D Premium

LARGE 21X19 FOV FOR COMPLETE
DIAGNOSTIC IMAGING NEEDS

THE OPTIMAL SOLUTION FOR
AIRWAY AND ENT DIAGNOSIS

AUTOMATICALLY GENERATES UP TO
6 TYPES OF IMAGES IN 1 SCAN

THE MOST SUITABLE FOV SIZE FOR A COMPLETE DIAGNOSIS

A 21x19 FOV is the optimal size for oral maxillofacial surgeons and orthodontists. Anatomically, it captures the regions from the roof of the orbits and nasion down to the hyoid bone.

- ✓ Oral and maxillofacial surgery
- ✓ Facial reconstructions
- ✓ Orthodontic treatment planning
- ✓ Complex orthognathic cases

The i3D Premium utilizes a proprietary 49.5 μm high resolution x-ray sensor, which makes it the finest pixel and highest resolution CBCT available on the market today.

[Multi FOV]

The i3D Premium offers a wide range of selectable Fields of View (FOV).

This selectable FOV helps limit patient radiation exposure, and allows users to capture only the region of interest. Clinicians can select between 21x19, 17x15, 17x11, 12x9, and 8x8 fields of view.

The i3D Premium provides an ENT mode (Airway/TB&PNS) for ENT specialists.

The fields of view are based on patients' most common cases such as cholesteatoma, chronic sinusitis, and sleep apnea.

[Airway] A Powerful Function for Airway Volume Analysis

- 2-click airway region selection

- Segmented airway volume and color coded thickness measurements
- Automatically calculates total volume and minimum area measurements

[TMJ] Simultaneous Analysis for both TMJ

- Instant automatic cross-sectional images

- Easily segment and separate the Condyle or Fossa
- Rotation for an accurate diagnosis

*Airway & TMJ analysis available on Ez3D-i V4.1

AUTOMATICALLY GENERATES UP TO 6 TYPES OF IMAGES IN 1 SCAN

One scan with the i3D Premium, can capture the raw data needed for a CBCT, Panorama, PA Ceph, Lateral Ceph, SMV Ceph, and Waters' View Ceph. With this scan, the system is capable of capturing images for craniofacial, maxillofacial, and orthodontic treatment planning.

VALUE-ADDED AUTO IMAGE SELECTION

Select the image type needed for your treatment plan.

* Conventional Panorama mode is included.

E142 1/3

Strong Support

For Improving Hand Hygiene Compliance

3M™ Avagard™ Family of Hand Antiseptics Wall Brackets and Dispensers

Are you looking for another way to support hand hygiene compliance?
Here are three reasons these wall brackets and dispensers can help:

- Promotes patient safety by putting an effective hand hygiene product right where your staff needs it.
- Color may increase awareness for hand hygiene compliance.
- Helps create awareness of hand hygiene, a key critical factor influencing adherence to protocol.*

* Backed by CDC, Joint Commission and the 3M Six Sigma Hand Hygiene Compliance Program in 5 facilities

Sharps Container (Wall Mount) Cabinets by Covidien

CABINET, SHARPS, 2 & 5 QT, WALL ENCL

- Mounted wall enclosures secure sharps containers, keep counter space clear, and help prevent access to contents in high traffic areas.
- Contents can be viewed by hospital personnel, but unsightly items are not fully visible to patients and visitors.
- These sturdy enclosures are made of ABS plastic - the same material used in football helmets.

Shelf is removable to convert two smaller compartments to one large storage area

Product Description:

- Protection System - Surgical
- Holds a variety of protective apparel in four compartments, O.R. coveralls/jumpsuits or gowns, and a variety of medical supplies in built-in storage area
- Hinged lid over bulk compartments
- Removable shelf for one large storage area
- Keyholes for wall mounting
- Made of quartz ABS plastic and clear PETG

Primary Area for Product Usage:

- Primary care areas: O.R. dressing rooms, surgery centers, labs, dental centers, interventional radiology

Package Specifications:

- 27"L x 8"W x 32"H (68.6 cm x 20.3 cm x 81.3 cm)
- 14.0 lbs (6.4 kg) - approximated

Product Specifications (overall external dimensions):

- 25.00"W x 30.19"H x 6.75"D (63.5 cm x 76.7 cm x 17.1 cm)
- 11.7 lbs (5.3 kg) - approximated

Mounting Specifications:

To remove shelf, grip shelf lip at center, lift and tilt. Pull the shelf through the front, creating one large storage area.

Hinged lid makes filling the four bulk compartments quick and easy.

Removable Shelf provides option for larger supplies or two smaller compartments.

The shelf can be stored inside the unit in the same area, behind the dispensed product, either horizontally or vertically, as shown.

To insert shelf, fit back edge of shelf into notched back of organizer through top section. Lower shelf lip to rest on edge of opening.

Organizer should be mounted securely to a wall through keyholes and through-holes in back with screws approved and provided by building maintenance.

Parts included:

- Organizer
- Shelf

Tools required:

- No tools are required for assembly of the organizer

Advantage

Designed for Long-Term Heavy-Duty Applications

The combination of copolymers (Acrylonitrile, Butadiene, and Styrene) gives ABS an excellent combination of strength, rigidity, and toughness.

Major Benefits

Durable

ABS has good chemical and stress-cracking resistance. It is tough, dimensionally stable, and will hold up to long-term use.

Cleaning

Use mild cleaner or soap and water to clean. Petroleum-based oils, solvents, and paints should not be used.

Strength

ABS plastic possesses good strength and performance characteristics at a reasonable cost. These qualities make it perfect for a wide variety of applications, including medical and laboratory equipment.

Appearance

The quartz, lightly textured finish has a clean, attractive look.

Lower half, lid and back of dispenser is ABS Plastic

Advantage

Designed for Long-Term Heavy-Duty Applications

Copolyester resin is designed for heavy-duty applications, and is used by Bowman® HealthCare Dispensers exclusively.

Major Benefits

Toughness

Copolyester (PETG) is typically 15-20 times tougher than general purpose acrylic. PETG is made to withstand handling and reduce losses due to breakage.

Chemical Resistance

PETG resists a variety of chemicals and commonly used cleaning agents.

Impact Strength

PETG is tough and durable (not brittle), providing years of trouble-free functionality and long life.

Clarity and Gloss

PETG looks good and makes an attractive display. Clear optical characteristics mean the viewer can see the content, read text, and see true colors through the material. Complies with FDA regulations for food contact.

Easy to Clean

Use clean soft cloths or sponges to wash with mild cleaners and follow with a warm water rinse. Do not use abrasives, high alkaline cleaners, or petroleum-based products. Do not leave cleaners on PETG for long periods, wash immediately. Don't apply cleaners in direct sunlight or at elevated temperatures. Do not use scrapers, squeegees, or razors.

Clear plastic on four bulk dispensing areas is PETG plastic

Improve business efficiency • Improve employee workplace safety • Improve patient care & management

Omni Quadruple Glove Box Holder - #305304

Steel glove box holders are built for heavy duty use. Constructed of durable stainless steel. Easy to care for finish that will withstand years of use and still look new. They are ideal for use in medical, lab and food prep functions or any area where cross contamination is an issue or protective gloves are needed. These holders are simple to load and can be mounted vertically or horizontally on a variety of surfaces. Each glove box holder accommodates up to four different glove sizes to meet staff needs. The dispenser measures 10 inches high by 16 inches wide by 3 3/4 inches deep. All single glove boxes fit this model. This unit includes a 5 year warranty.

- Stainless steel strength and durability
- Easy to clean, load and mount
- Vertical or horizontal holder for four glove boxes
- Measures 10" H by 21" W by 3³/₄" D

Monoject™ Container Hardware Brackets

Brackets secure sharps containers to walls and med carts by maintaining the container upright throughout use. Locking brackets are available to help prevent access to contents in high traffic areas.

- Locking wall brackets are unobtrusive and securely hold container in place
- According to NIOSH's guidance, containers should only be used with hardware that is manufactured specifically for them¹
- OSHA Regulation 29 CFR 1910.1030(d)(4)(iii), "During use, containers for contaminated sharps shall be maintained upright throughout use..."
- Cardinal Health offers a complete line of brackets and holders to ensure your safety and compliance

ErgoTech™ Workstations

The ErgoTech’s ergonomic design makes the work day more efficient and comfortable. Standard with 110-watt color corrected lighting and two case pan shelves, this all steel durably constructed workstation will stand the test of time.

Note: Obtain information from Owner on Certification where required prior to Inspections

Photo shown with optional arm rests and magnifying lens

Standard Features Include:

Variable speed independent dust collection system with front suction and grinding hood, 110-watt color corrected lighting and two case pan storage shelves, 1/2" Solid Surface countertop, steel construction, powder coating, drawers, gas valve, electrical outlets, and air blow gun

Optional Items:

Handpiece, fixed arm rests, 2x Magnifer

Home ■ Products ■ NevinLabs ■ Workstations ■ Ergotech Self-Contained Workstations

Ergotech Self-Contained Workstations

Each Ergotech™ workstation has a quiet, powerful, vibration-free, fractional horsepower, variable-speed dust collector motor with a lighted power switch. Dust is collected in a unique, disposable filter bag. The dust collector motor may be operated in either manual or automatic modes. In manual mode, the power switch operates the dust collector motor. In automatic mode, the electric handpiece controls the dust collector motor. The control panel includes indicator lights, which monitor the performance of the filter bag and dust collector motor. Exceptional shadow-free lighting is provided by 2 55-Watt color-correct fluorescent tubes. Individual Ergotech lab benches are shipped pre-piped for gas and air, and pre-wired for electricity.

Functional features to make your work easier and more precise...

- Individual dust collecting system with removable suction hood and safety shield
- 2.5X magnifying lens*
- Generous size magnetic vinyl top saver
- Solid, 1/2" solid work surface
- Removable, stainless steel scrap drawer
- Removable, adjustable arm boards*
- All steel construction with durable scratch and chip resistant powder coating finish
- Single workstations, pre-piped for gas and air, pre-wired for electricity
- AGA approved gas valve for Bunsen burner
- OSHA compliant air gun with regulator
- Drawer storage cabinet with steel roller bearings
- 110 watt color correct full-spectrum fixed height lighting system with 2 case pan storage shelves

← No Gas

Optional features

No. 9748: 24" x 48" Footprint; Available 32" or 34" high

NevinLabs Standard Color Options

Model MT12

12" Model Trimmer

Ray Foster Model Trimmers are constructed from heavy gauge cast aluminum with stainless steel and solid brass fittings. The machines are finished, inside and out, with a high gloss white epoxy coating that offers durability, corrosion resistance, and a very attractive finish. Resiliently mounted and precision balanced for smooth, quiet operation, they are designed to assure years of service free performance under the most demanding laboratory use. The Ray Foster Model Trimmers are the original "swinging door" trimmer and is the benchmark by which other model trimmers are measured.

Model MT12

- Heavy-duty, capacitor start ball bearing motor
- Adjustable work table – Full radius water spray
- Reversible grinding wheel – Hinged door secured by single knob
- Optional automatic water valve – Motor is UL recognized and CSA certified for electrical safety

Include Automatic Water Valve

Specifications

- 1/2 HP motor, with 1.25 service factor producing .625 HP actual power
- 12" diameter, 1/4" thick grinding wheel
- 5-1/4" wide, 5" high cutting surface
- 17" high, 17" wide, 16" deep
- 115 volt, 60 Hz standard or ~~230 volt, 50/60 Hz optional for export~~
- Net weight 41 lbs, shipping weight 49 lbs

INTRODUCTION

Thank you for purchasing a quality **Foster** product. Your Foster Model Trimmer is designed to give years of trouble free service with minimal care and maintenance. Before putting your new machine to work, please become familiar with this operator's manual to obtain maximum performance and satisfaction.

IMPORTANT SAFETY INSTRUCTIONS

WARNING! When using electrical tools, basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and personal injury including the following:

- ✓ **Read and Save** this manual for future reference.

- ✓ **Use Proper Grounding.** Your Foster Model Trimmer is equipped with a three-conductor grounded cord and plug. It should be plugged into a three hole grounded receptacle of the same voltage as inscribed on the machine.
- ✓ **Power Cord.** Power supply, plug configuration, and electrical codes vary from country to country. The cord supplied with your Foster Alloy Grinder is approved for use in the country of destination. Use only this power cord or one that is approved for use in your country.

- ✓ **Plug into a Branch Circuit with 16A Circuit Breaker.** To reduce the risk of fire and to protect the units electrical system plug into a branch circuit with a 16 amp circuit breaker.

- ✓ **Disconnect the Power Cord.** Before performing any maintenance or repairs turn the unit off and unplug the power cord to prevent electrical shock or unintentional starting.

- ✓ **Wear Additional Eye Protection.** Protect your eyes from model trimming debris and the possibility of a fractured wheel by utilizing approved safety glasses or goggles when operating the Foster Model Trimmer.

- ✓ **Wear Respirator Dust Mask.** To protect against the inhalation of dust and fumes a dust mask should be worn while grinding.

- ✓ **Keep Your Fingers Away From the Grinding Wheel.** Use caution when operating the model trimmer. If the abrasive wheel appears dull, don't compensate by applying more pressure, change the wheel.

- ✓ **Always Keep the Door Securely Closed .** Be certain that the door is closed and secured with the door secure knob before turning the machine on. NEVER turn the motor on with the door open.

- ✓ **Wear Proper Clothing.** Do not wear loose clothing or jewelry, which may get caught in rotating parts. Tie back long hair.
- ✓ **Maintain the Unit.** Inspect periodically for damaged or worn parts. Follow the instructions for maintenance. Don't use if the power cord, motor, switch, or other parts are in poor condition. Don't use if the unit has been dropped or damaged. Have a qualified service person inspect and replace parts when necessary.
- ✓ **For Laboratory Use Only.** The Foster Model Trimmer is intended for use by trained professional laboratory personnel only.

INSTALLATION

Place the model trimmer in a suitable counter top location next to a sink and near a water source.

Water is supplied to your Foster model trimmer through a flexible polyethylene hose, which is fitted with a 1/4" male pipefitting. If the available water source is other than a 1/4" female pipe fitting, an adapter must be obtained to complete the installation. A local plumbing supply will usually have the required adapter.

NOTE: It is recommended that you do NOT use copper tubing to connect the model trimmer to the water supply. The problem with copper tubing is that it is not flexible. This nullifies the feature of the hinged door because the hose must flex when opening the door.

Water is discharge from the model trimmer through a 24" x 1" ID flexible hose. Be sure that the hose slopes downward to the drain allowing gravity to drain the model trimmer.

Longer lengths of both water supply and drain hose are available from Ray Foster Dental Equipment if needed.

PREVENTIVE MAINTENANCE

FLUSH THE MODEL TRIMMER DAILY

Your Foster model trimmer is a workhorse in the dental laboratory. It requires daily flushing and cleaning to prevent gypsum buildup and clogging. At the end of each use allow the motor to remain on and open the water adjustment to maximum for about 20 seconds. Turn the water off and allow the motor to run for an additional 10 seconds. Wipe the exterior of the model trimmer off at the end of each workday.

ELECTRIC MOTOR

The motor installed on Foster model trimmers is equipped with permanently lubricated, sealed ball bearings. No lubrication or maintenance is required.

DOOR SECURE

When closing and securing the door, do NOT tighten the door secure knob. It is only necessary for the door to "touch" the base casting for a leak free fit. Over tightening may cause leakage.

USE PLENTY OF WATER

The use of an adequate amount of water while trimming will keep the wheel clean and cutting. An inadequate volume of water will result in a clogged unusable wheel.

CHECK THE WATER SPRAY TUBE

It's a good idea to occasionally check the water spray tube to be sure all holes are open. A straighten paper clip is useful in opening plugged holes.

WATER VALVE

The brass water valve located on the door of the model trimmer is intended to be used as a flow control only, and not intended to be used as a water shut-off valve.

MODEL AND SERIAL NUMBER

When ordering parts or requesting service always give the machine model number and serial number which are inscribed on the identification plate located on the front of the Lab Master Model Trimmer.

EXCESSIVE VIBRATION

Excess vibration from your model trimmer is a result of one or both of the following:

1. An imbalance in the aluminum back plate as a result of accumulation of plaster and stone on the back.
2. An out-of-balance abrasive wheel due to stone build-up and/or wear, or an improperly balanced or non-balanced wheel. NOTE: Abrasive wheels purchase from us are precision balanced for smooth running. This is done by removing a portion of the heavy edge. As a result of the balancing process the wheel may be out-of-round, but is in balance.

To determine and correct an imbalance follow this procedure:

1. Remove the abrasive wheel from the model trimmer, close and secure the door, and turn the model trimmer on with the wheel removed. If the vibration has ceased, the problem lies with the grinding wheel, and a replacement is needed. NOTE: Sometimes the center mounting devise of the wheel (P/N M095 - Lock Button) is worn and does not center the wheel properly. A wheel that is mounted off center will also cause vibration. To check the Lock Button, remove it together with the wheel, and check it's fit in the center hole of the

wheel. It should slip into the center hole with no play. If it is not a snug fit, it should be replaced.

2. If the vibration is still present with the wheel removed, the problem lies with the aluminum back plate (P/N M222 for MT10, P/N M221 for MT12 and MT15). The backing plate must be removed and cleaned of all plaster, or replaced. To remove the aluminum back plate a Back Plate Removal Tool (item M816) is needed. Please refer to the "Accessories" section of this manual.

INSTALLATION OF REPLACEMENT WHEELS

1. Unplug the model trimmer from the electrical power source, remove the door secure knob (A), and swing the door open wide.
2. Loosen the three screws and remove P/N M095 Lock Button (B). The old wheel may now be removed from the trimmer. Remove the P/N M096 Cork Gasket (C) from the backside of the attach button, and replace it with the new gasket included with all Foster replacement wheels. If only reversing the existing wheel or using a wheel from a source other than Ray Foster, make sure that the existing cork gasket is in good condition, if not, a new one is needed. This is essential in preventing slippage of the abrasive wheel.
3. Install the new replacement wheel flush with the aluminum back plate, aligning the center of the wheel with the arbor hole of the back plate, and aligning the drive pin hole (D) of the wheel with the drive pin of the back plate.
4. Replace the lock button with the three screws. Tighten the three screw evenly, in rotation, and firmly enough to pinch the cork gasket. Close the door of the model trimmer, and secure it with the Door Secure Knob (A). Your Foster model trimmer is now ready to operate. **CAUTION: NEVER OPERATE OR TURN ON THE MODEL TRIMMER WITH THE DOOR OPEN.**

Water line valve thru sink deck

Drain hose into sink is common. If possible, coordinate grommet hole in counter to a large dishwasher "Tee" above the Plaster Trap below the sink

Unit usually positioned to the right of the sink due to drain hose

Example of Model Trimmer in Wet Lab

POLISHERS AND CONDITIONERS

POLISHING LATHE

with Wells Quick Chuck, 1/3 HP, 2 speeds. 1725/3450 RPM. 5-1/4" shaft. 115V, 60hz, single phase.

POLYPROPYLENE POLISHER

Heavy-gauge rubber splash pans, a light over each spindle, adjustable safety shield for each spindle, and a safety reset switch. Each spindle has a non-woven disposable filterbag.

Measures 19 3/4" H x 31 1/2" W x 19 3/4" D. 120V

STAINLESS STEEL POLISHER

Lathe has two operating speeds: 1800/3600 rpm.

Measures: 19 3/4" H x 31 1/2" W x 19 3/4" D. Requires 110V, 50/60 Hz electrical power.

HYDROCOLLOID CONDITIONER

Stainless steel construction. Includes safety features: motor thermal relay, overheating probe, micro-switch on lid, fuse. High-torque geared motor. 115V.

Measures: 19.7" H x 12.6" W x 10" D. 1.5 gallon capacity.

Vibrators

Our Premium Vibrators come in a variety of options. Ranging from small, medium and large, Buffalo Dental Vibrators are powerful and effective!

No. 200 Extra - Heavy Duty Vibrator

Our Largest, Most Powerful Vibrator for Multiple Flasks and Dense Castings

Large 10 ½" long x 7 ½" wide rubber-covered work platform for convenience and spill control. Improved electronics and fully variable speed control for easy and powerful operation. Solid, beige enameled housing provides stability and eases clean-up tasks. 4 ½" high. 19 lbs.

84500 No. 200 Vibrator, 120 V AC

No. 2 Heavy Duty Vibrator

Medium Size with High Powered Vibration

Ribbed 6" diameter rubber-covered platform designed to hold larger flasks. Features a three-speed control switch for variable operation. Beige enameled housing (11" wide x 4 ½" deep x 6 ½" high, 13 lbs.) for stability and performance.

84400 No. 2 Vibrator, 120 V AC

No. 1A Vibrator

Our Most Popular Vibrator- At a Surprisingly Affordable Price!

Improved 3-speed electronics and strong, dependable, performance make this our most popular small vibrator. Durable 4" diameter rubber cover and suction cup feet improve stability and ensure quiet operation. Small size (4 ½" long x 4 ½" wide x 4 ½" high, 6 lbs.) fits conveniently in office labs.

84350 No. 1A Vibrator, 120 V AC

84324 SplashCap™ Splash Guard for 1A and 1B Vibrators

No. 1B Vibrator

Small Vibrator with Variable Speed Foot Control

Identical size to our 1A Vibrator, but features foot pedal operation instead of a rotary switch. Pedal offers convenient hands-free operation and fully variable speed control.

84360 No. 1B Vibrator, 120 V AC

Movable counter top plaster vibrators - moved to use and stored in these positions

E155 1/4

Invented by
John Gleason
Gleason Enterprises

U.S. Patent # 6,049,922

GT64 PACKAGE

The **Gleco Trap**, marketed and distributed by **Liquid Assets, Inc.**, is an innovative, inexpensive solution to messy, hard-to-use sink traps. The **Gleco Trap** provides you with an economical plumbing trap that is easily installed and maintained. The **Gleco Trap** is connected below the sink and collects solids in a bottle. When the solids fill approximately 90% of the bottle, the excess water in the trap is drained through a valve, the bottle is exchanged with a replacement bottle, the valve shut and the trap is back in service. Bottle exchange is rapid and done without the need of tools (less than 2 minutes!). Most of all, there is no mess and minimal chance of water spillage.

KEY BENEFITS

- Adapts easily to existing plumbing, wherever there is a p-trap (U-shaped joint).
- Smaller bottle means less odors generated in, and emitted from, the trap.
- Translucent bottle enables you to see the contents of the trap at any time.
- The fill line easily and quickly shows when the trap needs to be serviced.
- Drain valve allows for all the water above the bottle to be drained prior to removal, eliminating spillage.
- Replacing the bottle takes less than 2 minutes, from start to finish, with no tools, no spillage, and no risk of coming into contact with the solids contained within The Gleco Trap.

Three sizes available: The **GT64** is the most common package, suitable for most standard sinks. The **GT43** and the **GT19** are more appropriate for deep utility sinks or sink cabinets without much space under the sink. To determine your size, follow the directions on the inside of this flyer.

Eliminate cleaning out gunk like this with The Gleco Trap.

Solid Waste Containment Plumbing Trap
manufactured to the requirements of
IAPMO standard IGC 167-2001.

Product to be installed with other IAPMO R&T
listed fittings, in accordance with the
manufacturer's instructions, and the requirements
of the latest edition of the Uniform Plumbing Code.

The Gleco Trap is made in the USA!
Ask your local supplier for The Gleco Trap
or visit www.sinktrap.net for more information.

GT19 includes:

- 2 • 19 ounce bottles
- 1 • 32 ounce bottle (for draining)
- 2 • Lids for extra bottles
- 1 • 1-1/2" x 8" sink tailpiece
- 2 • 1-1/2" slip-joint washers
- 4 • 1-1/2" slip-joint nuts
- 1 • 1-1/2" flat washer
- 1 • Extra O-ring
- complete instructions
- needs 11.5" minimum clearance

GT43 includes:

- 2 • 43 ounce bottles
- 1 • Lid for extra bottle
- 1 • 1-1/2" x 8" sink tailpiece
- 2 • 1-1/2" slip-joint washers
- 4 • 1-1/2" slip-joint nuts
- 1 • 1-1/2" flat washer
- 1 • Extra O-ring
- complete instructions
- needs 13" minimum clearance

E155 2/4

INSTALLATION

To determine the appropriate size for The Gleco Trap and replacement bottles, measure from the vertical center of the waste line to the floor.

Installation in most plumbing situations is fast and doesn't require tools. Simply remove the P-Trap and put The Gleco Trap in place (hand tighten only). Sink cabinets that have a small or tight area may require some creative plumbing solutions to maximize the space to fit The Gleco Trap into place. If you add extra bends or elbows to the pipe, they must be added on the waste line *after* The Gleco Trap (never between sink drain and The Gleco Trap).

STEP 1

STEP 2

STEP 3

STEP 4

YOUR SOURCE FOR THE GLECO TRAP:

If contact information is not showing here, please contact the plumber, plumbing supplier, clay supplier, or dental supplier where you originally purchased this Gleco Trap for additional Gleco Traps, bottles, or replacement O-Rings.

GT64 includes:

- 2 • 64 ounce bottles
- 1 • Lid for extra bottle
- 1 • 1-1/2" x 8" sink tailpiece
- 2 • 1-1/2" slip-joint washers
- 4 • 1-1/2" slip-joint nuts
- 1 • 1-1/2" flat washer
- 1 • Extra O-ring
- complete instructions
- needs 15.5" minimum clearance

Important:

If you use The Gleco Trap in a kitchen, you are putting very hot things like coffee grounds down the drain, run cold water at the same time. Very hot liquids and solids could potentially deform the plastic of the bottle and cause a leak.

When switching the bottles, make sure to smear a little petroleum jelly onto the top edge of the replacement bottle (not the threads) to create a leak-free seal and prevent the rubber o-ring from dragging.

E155 3/4

THE GLECO TRAP

Use petroleum jelly on the rim **every time** you switch bottles!

O-Ring shown in place on the inside of The Gleco Trap

O-Rings

Replace worn or stretched O-rings to prevent leaks at the top of the bottle. When replacing an O-ring, add a little petroleum jelly to the O-ring or the channel it fits into.

package of 12

The Gleco Trap is made in the USA! Ask your local supplier for extra parts or for more information on The Gleco Trap.

MAINTENANCE

Place extra bottle (or container) that can hold at least 30 ounce of water underneath the arm on the right. Open valve to drain water at the top of The Gleco Trap. DON'T FORGET to turn valve into off position again. Unscrew the used bottle and replace it with another bottle or even the reuse the same bottle after disposing of the contents properly.

COMMON CAUSES OF LEAKS

E155 4/4

When your Gleco Trap is properly installed, it shouldn't leak. But if it does, here are a couple of common problems and solutions. If your problem is not solved by these notes, contact us and we'll talk about your specific situation.

1. The O-Ring is out of place or crimped.
 - Make sure it's seated in the channel provided.
 - If you are installing a brand-new O-Ring, give it a quick tug to stretch it slightly and dab a little petroleum jelly on it (or into the channel) before installing - it will fit into the channel a lot easier.
2. Verify the threads on the bottle are properly lined up when you screw on the bottle.
 - Don't over-tighten the bottle. Screw it on by hand only until it's snug.
3. Don't pour extremely hot/boiling water down the sink without running the cold water at full blast while doing so.
 - The Gleco bottle is a thermoplastic bottle (originally formed by heat) and too much heat will cause them to deform.
 - The most common occurrence of this leak is in coffee shops when they pour hot coffee grounds down the sink alone. The Gleco Trap works great for trapping coffee grounds, but you need to run the cold water when you dump them down the drain.
4. Make sure you put a little petroleum jelly on the top rim of the bottle EVERY TIME you switch bottles.
 - Failure to put petroleum jelly on the rim will cause the O-Ring to drag and stretch out of shape or fall out of place.
5. Double-check the bottles. Although it doesn't happen often, occasionally the 2-piece mold for the bottles is off just a little bit and can cause a raised seam that could interfere with the seal the O-Ring creates. In most cases, you can just file down the raised seam on the top rim and you'll be fine.
6. Check the valve - you might not have gotten it completely shut.
7. Install The Gleco Trap so it hangs plumb. Don't cut corners on checking this part when installing The Gleco Trap. If it doesn't hang straight down, the weight of the bottle when it's hanging at a slight angle can prevent a good seal with the O-Ring as well as creating added pressure on the threads of the bottle. See the picture marked "misaligned installation" for an example. Notice how the slight angle led the customer to believe that support (the wooden block under the Gleco Trap) was needed? This installation also leads into our next problem.
8. If you have a utility sink, make sure that it's secured to the wall or floor so it doesn't move (which caused The Gleco Trap to hang at a slight angle in the example above). Even if you've taken the time to make sure it hangs plumb on installation, a bump of the sink when it's unsecured could pop the seals on your connections to The Gleco Trap and create a leak.
9. Bad connections to the sink drain or the wall waste line can cause leaks. In the example above, the waste line shows a light raise after The Gleco Trap, where it should be parallel to the floor.
10. Pets, kids, and errant adults could accidentally jar a Gleco Trap and pop the connections when it's installed under an open sink (most recent customer leak issue attributed to this reason: a Bull Mastiff ran head-first into The Gleco Trap).

Properly seated O-Ring

Petroleum Jelly on rim

Misaligned installation

Ask your local supplier for extra parts or information on The Gleco Trap.

Sure-Grip® EX Undercounter Flammable Safety Cabinet, 22 Gallon, 2 Manual Close Doors, Yellow

Protect workers, reduce fire risks, and improve productivity by storing flammable fuels and chemicals in code-compliant safety cabinets. Designed to meet OSHA and NFPA standards, Sure-Grip® EX cabinets are constructed of sturdy 18-gauge (1-mm) thick double-wall, welded steel with 1-1/2" (38-mm) of insulating air space for fire resistance. High-performance, self-latching doors close easily and securely for maximum protection under fire conditions. Fail-safe closing mechanism ensures three-point stainless steel bullet latching system works every time.

For added security, U-Loc™ handle comes with a cylinder lock and key set or accepts an optional padlock. Haz-Alert™ reflective warning labels are highly visible under fire conditions or during power outages when illuminated with a flashlight.

Patented SpillSlope® galvanized steel shelves direct spills to back and bottom of a leakproof 2" (51-mm) bottom sump. They adjust on 3" (76-mm) centers for versatile storage. Cabinets also feature dual vents with flame arresters, four adjustable self-leveling feet, grounding connector, and trilingual warning label. Durable lead-free epoxy/polyester powder-coat finish provides excellent chemical resistance.

Manual-close door(s) opens to a full 180 degrees and self-latches when pushed closed. Self-close door(s) shuts and latches automatically when a fusible link melts at 165°F (74°C) under fire conditions. Unique, concealed self-closing mechanism offers obstruction-free access to contents.

All door styles meet OSHA and NFPA 30; self-close door styles also meet NFPA 1 and the International Fire Code.

Most cabinets are FM approved and all come with a ten-year warranty.

Take advantage of undercounter space to safely store flammable liquids. Each cabinet is sized and fitted with a 3-1/2"H x 2-1/2"D (89-mm x 64-mm) kickplate to mount flush with other cabinets. These cabinets have all the great features and benefits of our classic cabinets as outlined below.

Frequently Asked Questions

Does my safety cabinet need to be grounded?

It is necessary to ground a safety cabinet if you are dispensing liquids from container(s) inside the cabinet, and the potential of an ignitable vapor is possible. This is not to preclude one from grounding all cabinets as a best practice. Please see our TechTALK on Safety Cabinet Grounding

(/media/techtalk/TT-Safety-Cabinet-Grounding.pdf) for further information.

Will my modification void the FM Approval and Justrite warranty to a safety cabinet or safety can?

Modifications to any FM Approved products void the approval of that product and the Justrite warranty. The modification falls outside the evaluation for the approval and FM's quality assurance program. Modifications can make a safety product unsafe.

Visit the FAQ page (/faq) to find more answers about safety cabinets, cans, and more.

CLASSIC LAB EQUIPMENT

AMANNGIRRBACH

smartbox X2

The most homogenous plaster dispensing method yet

Weighing and mixing plaster and water by hand is too imprecise and time-consuming by the high standards of the dental laboratory. Aside from ensuring a consistent high degree of dosage precision, the Smartbox is easy to operate and pays for itself within a few months.

Using the new dosage technology, the plaster is sprinkled very finely into the mixing beaker, which noticeably increases the homogeneity of the mixture

- _ Time, material and plaster savings of 20 to 25 %
- _ Finely sprinkled plaster using the new patented plaster dosage technology
- _ Multifunctional turn/ push button for simple and quick programming and programme selection
- _ Easy operation - error-free working for everyone
- _ Reproducible mixing ratio at the push of a button, accurate to within a gram
- _ Integrated scales automatically measure the dosage or for manual weighing
- _ Enables clean and dust free operation

Easy to fill the silo at the machine

One switch for everything - multi-functional dial / button

Fine plaster curtain due to new dosage technology

TRIAD® 2000 LIGHT CURING UNIT GENERAL DESCRIPTION & SPECIFICATIONS

The DENTSPLY Triad 2000 Light Curing Unit is a precision engineered unit, constructed to exacting specifications with the finest materials and workmanship. It contains controls and components for curing Triad visible light activated materials. The unit is manufactured and distributed by DENTSPLY International Inc., York, PA, through authorized dental dealers throughout the world.

The DENTSPLY Triad 2000 Unit incorporates specific controls with a rotating platform and lift, and through a tungsten halogen light source, cures light-activated materials by use of visible light. The adjustable table features selective controls to accommodate the processing of all types of visible light cure materials in various appliance shapes, with or without the use of a model (cast).

Refer to Figure 1 for location of the following unit controls and components:

POWER: On/Off switch. The cooling fan will operate.

TABLE: Activates rotation of the table.

CURE: On/Off switch. Activates the lamp when access door is closed. (Access door actuates safety interlock switch.)

TIMER: Rotating timer dial programs processing time.

TURNTABLE:
The turntable is raised and lowered by the top-mounted lift knob. The turntable will raise or lower to internal stops. The rotation of the turntable is provided by a gear-motor operating at 6 rpm. Rotation is activated by the table switch.

CURING CHAMBER:
Contains a high-power, specially angled tungsten halogen reflector lamp which projects optimum photocure light on the turntable location. The lamp is mounted to be replaced easily.

COOLING FAN:
One 12 watt, 115V fan operates when the power switch is ON, cooling the lamp housing and the curing chamber.

TRIAD® 2000 LIGHT CURING UNIT INSTALLATION

UNPACKING AND INSTALLATION

DO NOT CONNECT POWER CORD TO OUTLET AT THIS TIME.

1. Remove unit from shipping carton and place in the desired operating location.
2. Open the processing chamber door and remove packing material.

NOTE: Save shipping and packing materials. If service is required at any time on your Triad 2000 unit, you are responsible for its safe* shipment back to DENTSPLY. This is best accomplished if the original shipping carton and packing materials are used.

3. Connect the POWER cord to an appropriate power source.
4. Turn the POWER switch ON. The cooling fan should operate.
5. With the access door closed, set the TIMER dial to 1 minute. Depress the CURE switch to ON. The lamp should illuminate.
6. Depress the TABLE switch to ON. The table should rotate.

TRANSLATION OF THE ORIGINAL INSTRUCTIONS FOR USE

4 Commissioning

EN

4.1 Setup Recommendations

Operate the appliance at room temperature 15 - 30 °C [59 – 86 °F].

When setting up the appliance, please note the following:

- Do not place the appliance under a heat source.
- Do not place the appliance in front of open windows.
- Do not set the appliance up where it will be subjected to direct sunlight.
- Do not subject the appliance to high humidity.

4.2 Wall Mounting

Please have the following items on hand:

- pencil,
- drill template,
- Phillips head screwdriver,
- drill,
- drill bit 8 mm [5/16th inch] - appropriate for the wall material.

Make sure the wall on which you intend to mount the device is capable of bearing its weight!

Please ensure that there are no electric cables or water pipes running through the wall at the place of installation!

- ⇒ Establish optimum working height.
- ⇒ Align the drill template and mark the drill holes.
- ⇒ Drill the required holes >>> depth at least 55 mm [2.2 inch].
- ⇒ Insert the dowels.
- ⇒ Screw the top screws into the dowels. Allow the screws to protrude 9 - 10 mm [0.35 - 0.4 inch].
- ⇒ Screw the lower mounting bracket into place.
- ⇒ Hang the appliance on the wall.
- ⇒ Secure the device by tightening the knurled nut (10, Fig. 3).

Tighten the knurled nut securely.

Fig. 2

4.3 Benchtop Models

The stand (19) can be used to convert the vacuum mixer to a floor-mounted appliance.

- ⇒ Position the stand on a level surface.
- ⇒ Hang the appliance in the stand.
- ⇒ Secure the appliance by tightening the knurled nut (10).

Tighten the knurled nut securely.

The stand is not part of the standard delivery and must be ordered as an optional accessory (refer to section „3.3 Accessories“).

Fig. 3

4.4 Electrical connection

Ensure the mains supply and voltage marked on the name-plate is identical.

- ⇒ Secure the mains cable (17) through the cable safety catch (9).
- ⇒ Plug mains cable into socket (8) on appliance.
- ⇒ Plug in at the mains.

Fig. 4

3 Product description

10 Guarantee

Renfert gives a **3-year guarantee** on all parts of the Twister evolution / Twister evolution venturi provided that the product is used in accordance with the operating instructions. The original sales invoice of the specialist depot is required for a claim under guarantee.

Parts which are subject to natural wear and tear (wear parts) and consumables are excluded from the guarantee. These parts are marked in the spare part list.

The guarantee is rendered void in the case of incorrect use, non-adherence to the operating, cleaning, servicing or connection instructions, repairs carried out by the owner or repairs that are not carried out by a specialist firm, use of replacement parts from another manufacturer or unusual or unapproved uses not specified in the user guidelines.

Successful claims under guarantee do not extend the guarantee period.

11 Disposal instructions

The appliance should be disposed of by a specialist firm. The specialist firm should be informed of any hazardous residue in the appliance.

11.1 Disposal instructions for countries in the EU

To conserve and protect the environment, prevent environmental pollution and improve the recycling of raw materials, the European Commission adopted a directive that requires the manufacturer to accept the return of electrical and electronic appliances for proper disposal or recycling.

Within the European Union appliances with this symbol should not therefore be disposed of in unsorted domestic waste.

For more information regarding proper disposal please apply at your local authorities.

Product Description

Use with Essix Brand and Dreve plastics to fabricate top-quality removable dental appliances such as nightguards, sports mouthguards, retainers and more.

- Barcode scanner programs heating and cool-down times. Barcodes are found on Essix Brand and Dreve plastic boxes and in the Plastics Guide. Manual data entry is also possible.
- Variable pressure of up to 6 bars (87 psi) produces excellent internal adaption
- Vertical forming design insures consistent results
- Red LEDs point out active heating
- Safe operation: piston turns down automatically with two-hand-control
- Accepts 120mm & 125mm circle or any square materials
- Space for optional lead granules
- Optional insert allows use as a flask press or pressure polymerization unit
- **115 volt;** Requires compressed air - 18.1" high x 11.4" wide x 11.4" deep; 44 lbs.
- Two-year warranty

Supply Voltage 100-240V/ 50-60 Hz
Max Power Consumption: 115V - 270W
Fuse in Unit: T 3, 15A
Operating Pressure: 29 to 87 psi
Min Pressure: 29 psi
Max Pressure: 145 psi

X40 Premium Electric Lab Handpiece System

New 40,000 RPM High-Torque System Updates Our Classic X35 and Provides Additional Speed and Torque

- New 40,000 RPM Handpiece**
 40k blue electric handpiece features an improved heavy-duty spindle, upgraded bearings, and more durable square carbon brushes, providing higher speeds, smoother operation, and increased reliability

- Improved Console *Made in USA!***
 The upgraded control console features dual power outlets allowing fast and easy switching between two separate handpieces as desired (one handpiece included with system), saving time-wasting tool changes. Higher-voltage output and additional overload control help protect the handpiece from damage during extended heavy grinding

- Superior Control**
 The system provides exceptional control at ultra-low rotational speeds, high torque cutting power, and fully variable speed from 0-40,000 rpm. The X40 comes complete with a fully variable speed foot control for added versatility
- Heavy Duty Construction**
 Components and system designed to provide reliable and trouble-free operation. One year warranty
- Sizes**
Handpiece: 6.25 in. (159 mm) Long x 1 1/8 in. (29 mm) Major Diameter x 5/8 in. (16 mm) Front Diameter x 8.6 oz. (244 gm) Weight
Console: 7.25 in. (184 mm) Width x 7 in. (177 mm) Depth x 3.5 in. (89 mm) Height x 6.3 lb. (2.9 kg) Weight

<i>Item #</i>	<i>Description</i>
38085	X40 Electric Handpiece System Complete, 120V AC, including Control Console, 40k Blue Handpiece w/HP Collet, Variable Speed Foot Control, Handpiece Holder, Spare Square Carbon Brushes and Collet Wrenches
38087	X40 Electric Handpiece System Complete, 220V AC, including Control Console, 40k Blue Handpiece w/HP Collet, Variable Speed Foot Control, Handpiece Holder, Spare Square Carbon Brushes and Collet Wrenches
38025CN	Replacement HP Collet Chuck for X40 Handpiece, 3/32" Size
38025BS	Replacement Square Carbon Brushes for X40, Set of 2

For laboratory use only. Please use extreme caution and wear personal protective eyewear and equipment when operating this system. Follow bur manufacturer's recommendations for maximum safe operational speeds for burs
 Additional chuck sizes are available for X40 Handpieces- please call for details

Specialty Dust Collectors

SandVac

Specifically designed for abrasives!

- Ultra powerful motor captures abrasive media and material
- Whisper quiet (55 decibels) and ultra-low maintenance design
- Multi-stage filtration
- Accumulator™ Pre-Filter captures 99% of all abrasive material
- Dual function remote control included
- Plug in your micro-abrasive blaster and control both with one easy step
- 2 year warranty

SandVac with Accumulator™ Pre-Filter 10211 ⚡

⚡ Available in 100, 220, 230, 240 Volts @ 50/60Hz CE 

Pre-Filtration

Accumulator™

The Vaniman Accumulator™ Pre-Filter is designed to protect and collect. It protects technicians and equipment from the damage caused by dust. It collects dust, valuable gold, aluminum oxide, stone, and acrylic before it reaches the dust collector.

Accumulator™ VMC-A300 (2 1/2" - 3" Plumbing)

Accumulator™ XL 10509 (2 1/2" - 4" Plumbing)

Air, dust particles and debris enter the swirling vortex inside the Accumulator™

Cleansed air flows up as dust particles are separated out and fall to the bottom.

Air flows up from the Accumulator™. This air is now 95% free from dust particles. The air will now go into the filtering system of the dust collector.

Dust particles and debris are collected in the Accumulator bowl, which is easily detached and emptied.

For over 27 years, Vaniman has established a tradition of Quality, Service, and Innovation for all the products it manufactures for the Dental Industry.

Starting with the original Accumulator™ Pre Filter , Vaniman's complete line of General and Specialty Dust Collectors, Micro Abrasive Blasters, Air Purification, and Electronic Waxing products, provide our customers quality the industry has come to expect.

Our Service department provides direct customer/technician interaction that streamlines technical assistance, as well as offers suggestions for properly configuring a product to achieve optimal performance.

Innovation has been the cornerstone of Vaniman Manufacturing over the last 25 years. The engineering staff continuously strives to provide our customers with the most robust, economical, and effective products available.

Vaniman remains committed to providing the Dental Industry the highest quality of products and service available through our worldwide dealer network.

Dust Collector Introduction

Dust collection is intended to capture nuisance, harmful, or precious material in any facility that has or creates such material. In some cases dust collection is a safety requirement, but in most cases dust collection creates a cleaner and more productive work environment.

It is important to consider the type and size of the attachment or work area, the type of filtration needed (HEPA, Odor, Pre-Filter), and the sound level requirements.

A Dust Collector For Every Need

PACKING LIST

- 1 - SandVac unit
- 1 - Power Cord
- 1 - Foot Remote
- 1 - Pre-Filter/Accumulator
- 1 - 2½" x 3' Hose with 1½" Hose End
- 1 - 2½" x 6' Hose with 1½" Hose End

IMPORTANT SERVICE INFORMATION:
 SAVE SHIPPING BOX AND FOAM FOR FUTURE SERVICE. SHIPPING WITHOUT PROPER FOAM MAY CAUSE DAMAGE TO UNIT

ASSEMBLY INSTRUCTIONS

1. Remove the unit and all additional parts from the two boxes. **Check** against the packing list.
2. Mount the Accumulator angle bracket on the side of the vacuum unit as shown by using the two screws provided. Assemble the Accumulator to the bracket with the circular clamp provided. Rotate the Accumulator to best route the hose then tighten the clamp.
3. Assemble the three foot hose, with the 1½" hose end, to the vacuum unit and the other end to the top of the Accumulator. Gently rotate and push the hose end into the black foam gasket. If the hose has difficulty connecting to the Accumulator, moisten the foam gasket with a small amount of water; the water will help ease the hose into place. Connect the other hose from the side of the Accumulator to the abrasive blaster. Use the grey hose end to connect to the Vaniman Sandstorm series or ports of 1½". For 2½" hose connections, remove the grey hose end and use the remaining white hose connector.
4. Plug the removable power cord into the socket on the top of the SandVac then plug the other end into a standard 110 Volt wall socket. Connect the black remote switch tube to the black remote switch connector on the unit; test by turning the power switch on or by pressing the remote switch.

SANDVAC 120V

MAINTENANCE

1. **Filter Bag Replacement** - When a noticeable drop in suction occurs in the unit or it shuts down, it may be time to replace the filter bag. Remove the thumb screws on the front of the unit to remove the front cover plate, exposing the filter bag. Remove the filter bag by sliding it off the inlet tube; the front of the cardboard reinforcement may need to be tilted downward slightly to remove the bag easily. Check the inside of the filter bag compartment, if dust is present please clean the compartment. Cause for residual dust may be the filter bag had been improperly installed. Vacuum out any dust before putting in a new bag, this will increase the life of the unit. Filter bag reorder number is **VMC-A400-5**, which can be ordered through your supplier.
2. **Installing a new filter bag** - Slip the cardboard reinforcement, with rubber seal, over the inlet tube. Tilt the front of the cardboard downward and slip the back edge up past the tube end; then rotate upward over the tube end. Then carefully tuck the edges of the filter bag into the filter bag compartment. Replace the cover plate and gently tighten the screw knobs. Only gentle pressure need be used to make the gasket seal as the vacuum pressure will draw the cover tightly.

CAUTION: Operating the vacuum with a plugged filter bag can cause permanent damage to the motor.

3. **Empty Accumulator Cup** - The accumulator has a cup on the bottom held in place with two toggle latches. The majority of dust collected will fall into this cup. Empty when 1/2 full; it is recommended to *empty the cup DAILY*. Turn the unit off before removing the cup. Gently tap the sides of the Accumulator to shake down dust into the cup. Hold the collection cup with a hand on each side directly below the toggle latches. With your index fingers, flip the toggles upward and then swing the wire bales outward. Lower the cup and empty the contents. Replace the cup onto the bottom of the Accumulator, swing the wire bales over the bottom rim of the Accumulator and snap the toggle latches down to secure the cup in place.
4. **Circuit Protector** - The unit is protected by a circuit breaker. Push in to reset.
5. For other maintenance problems or questions consult your dealer or call 1-800-VANIMAN and ask for SERVICE.

RECOMMENDED USAGE

To evacuate the blasting dust from an abrasive blaster such as aluminum oxide and silica sand.

ACCESSORIES & REPLACEMENT PARTS

The following items are offered to enhance the usage of your quality Vaniman unit. These items can be order through your supplier using the following part numbers. Please feel free to contact Vaniman Mfg. Co. with questions regarding our products.

550 Porta-Vac

[larger image](#)

Model: 550
Shipping Weight: 18lbs

Goes with E152

550 Porta-Vac Bench Top Dust Collector

A favorite of dental offices since its introduction several years ago, the 550 Porta-Vac is perfect for bench top light grinding and polishing with a hand piece or lathe. Featured enhancements include 40% more suction power, compact in line suction design, removable resin clean out tray, replaceable clear acrylic shield and reusable and replaceable pleated rear filter. The compact and lightweight 550 comes with a fluorescent light for hours of cool, bright operation and will collect 0.5 microns of dust and larger particles. Easy operation; take it out of the box, install the light, plug it in, and it is ready for use. The durable white powder coated heavy gauge steel frame is built to last, and the unit is made in the USA by Handler.

Shipping Weight: 18 lbs
Unit Dimensions: 8 1/2" W x 12" H x 14" D [21cmx30cmx36cm]

550 PORTA-VAC

**IMPORTANT INSTRUCTIONS
DO NOT DISCARD**

HANDLER 
MANUFACTURING CO., INC.

Over Eighty Years of Quality Manufacturing and Service...

612 NORTH AVENUE EAST, WESTFIELD, N.J. 07090

Ph: (908) 233-7796 • Fax: (908) 233-7340 • 800-27-HANDL • E-Mail: info@handlrmfg.com • web site: www.handlrmfg.com

INSTRUCTIONS FOR MAINTENANCE AND CARE 550 PORTA-VAC

GENERAL: Open the 550 carton and inspect it. Should damage have occurred in transit, contact the freight forwarder, IMMEDIATELY. Your 550 Porta-Vac was manufactured and tested prior to shipping. The unit was found to be in proper working order. Failure to report damage, promptly, to the freight carrier, will result in loss of your rights to place a damage claim.

USE: Your 550 Porta-Vac was designed and built to collect dry dusts and debris from various grinding and polishing operations. NOT FOR USE WITH ALUMINUM OXIDE. It is not designed to collect dust from prolonged polishing and grinding. Although the suction motor is built to function for long periods of time, we suggest its use is limited to 15 - 20 minutes per collection period.

Remove the 550 from the carton in which it was shipped. Check to make certain no other accessories were packaged with the shipment of your 550 Porta-Vac. The 550 was shipped with the following accessories:

- 1550 Porta-Vac with filter and Suction motor assembled.
- 1Florescent Light, light socket and cord.
- 1Resin Insert Pan

Before connecting the 550 to an electrical source, please complete the following:

1. Place the 550 on a sturdy table top.
2. Remove the packing from the resin insert pan, and place it in the bottom of the 550.
3. Unscrew the top of the plastic light socket. Place the base of the socket through the hole in the top, front left side of the 550 hood. From inside the top left side of the hood, screw the plastic top, clockwise, back onto the light socket, making certain the top is secure on the base of the socket. Double check this procedure to make certain the top is screwed back onto the socket's base properly and securely.
4. Unpack the florescent bulb, and screw it into the light socket from the inside upper left portion of the hood.
5. Place the Unit into the position on your tabletop on which it will be used (alongside a lathe, handpiece, etc.). Remove the protective covering from the safety shield. Position it in a comfortable location by loosening the thumb screws on either side of the shield. Retighten the thumb screws when the shield has been adjusted to the desired position. Connect cordset to proper electrical source.
6. Plug the unit into a suitable ground fault electrical socket. If the socket into which you will connect the 550 does not have a proper ground fault receptacle wired into the circuit, call a licensed electrician to have this completed promptly. All products utilized in a dental laboratory or operator **MUST BE** properly protected with ground fault protection in the circuit.
7. Turn the 550 ON by depressing the rocker switch located on the left rear top of the motor housing. The switch will light when the unit is activated.
8. The 550 is built for the collection of dusts and debris created by grinding and polishing operations. It is built for LIGHT GRINDING operations, only. If you are collecting dusts and debris for a period longer than 15 - 20 minutes, 3 - 4 times per day, we suggest the use of a larger dust collector. Handler builds a full line of dust collectors which are built for continuous collection of dusts. Contact us at the address, below for a copy of our current catalogue.

PARTS LIST FOR 550 PORTA-VAC

To order parts for your 550 Porta-Vac, please specify Model Number of unit, Serial Number and Part Number required.

- 1. P550-01 Shield for 550 (86B)
- 2. P550-02 Light Socket for 550
- 3. P550-03 Filter for 550 (550F)
- 4. P550-04 Rocker Switch for 550
- 5. P550-05 Thumb Knob for 550
- 6. P550-06 Line Cord for 550
- 7. P550-07 Resin Insert Pan for 550

Pentamix™ 3

Automatic Mixing Unit

Mix and dispense
twice as fast

Summary of advantages

- Dispenses Penta™ impression materials **in half the time of the Pentamix™ 2 Mixing Unit and faster than any other unit on the market**
- Saves counter space with the smallest footprint on the market
- Easy handling with push-button control on both sides
- Homogeneous mixing for void-free impressions
- Less waste – dispenses only amount of material needed
- Can be used with polyether, VPS and alginate replacement materials

Gain more working time with the fastest mixer on the market.

Experience the speed, ease and accuracy of the Pentamix™ 3 Automatic Mixing Unit from 3M ESPE.

With the touch of a button, the Pentamix 3 unit mixes and dispenses homogeneous materials – free of voids that interfere with the accuracy of impression detail and the fit of the final restoration.

Using Penta impression materials from 3M ESPE with the Pentamix 3 unit lets you mix and fill faster than any other unit on the market. That means:

- longer usable working time and reduced stress for doctors and assistants
- automatic mixing of quick-setting materials
- less chair time for patients

The Pentamix™ 3 Automatic Mixing Unit dispenses impression materials faster than any other unit on the market.

Source: 3M ESPE internal data

Speed isn't its only advantage. The unit has the smallest footprint on the market.

That helps you make the most of valuable office space. Its sleek, high-tech design keeps your office looking good, and the wall-mount design option lets you free up your counter completely.

3M ESPE

The Pentamix™ 3 Automatic Mixing Unit is even easier to operate.

The Pentamix 3 unit handles easily with push-button operation from both sides. This makes it easy to use for right- and left-handers alike. Effortless cartridge exchange and easy-to-attach mixing tips also increase procedure efficiency.

Eliminate strain and uncertainty out of mixing your favorite impression materials.

Enjoy the accelerated speed when you use your preferred Penta™ impression materials, including Impregum™ Penta™ Soft Polyether Impression Material, Imprint™ 3 VPS Impression Material and Position™ Penta™ Quick VPS Alginate Replacement.

More proven solutions brought to you by 3M ESPE, the worldwide leader in impression materials.

Easy to attach mixing tip without opening device cover

Easy cartridge exchange

Product name and working/setting times are visible, even when the device cover is closed

Push-buttons on left and right side allow for easy operation

Pentamix™ 3

Automatic Mixing Unit

Technical Data Sheet

Features

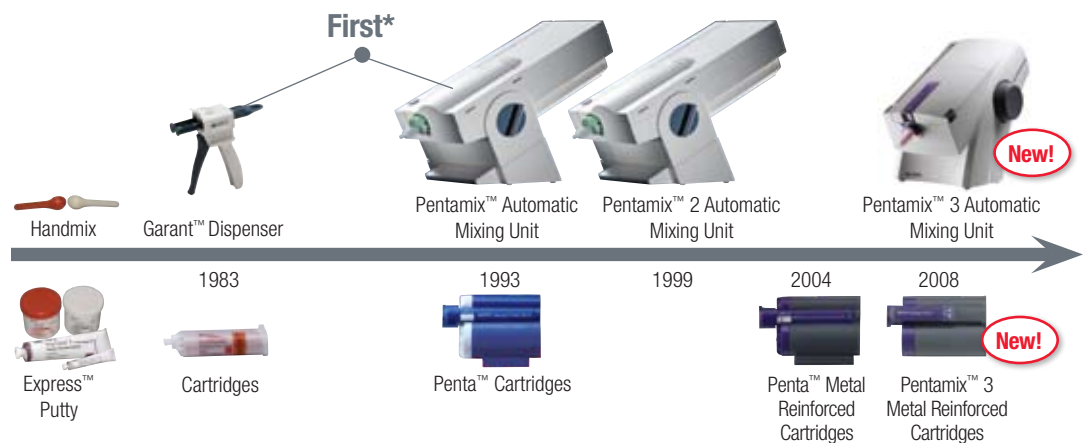

3M ESPE's third generation Pentamix device, the Pentamix™ 3 Automatic Mixing Unit, sets higher standards with the following features:

- Fastest Speed
- Smallest Size
- Easy Operation
- Reliable Timing
- High Mixing Quality
- Hygienic and Clean

Introduction/History

Taking precision impressions is a critical step in providing high quality restorations to patients. As a worldwide leader in impression materials, 3M ESPE innovations have continuously advanced impression technology for the past 40 years. These innovations did not only apply to the impression material side, but also focused on the handling and robustness of the dosing and mixing of these materials.

Important mile stones:

Since 1983 and 1993 respectively, many dentists worldwide have adopted the concept of hand and electrical automated mixing in their offices. Both the 3M ESPE hand automated dispenser and the original electrical Pentamix™ Automatic Mixing Unit replaced spatulation. The introduction of the Pentamix™ 2 Automatic Mixing Unit provided a dispensing extrusion speed twice that of the original Pentamix mixing unit.

* 3M ESPE was the first manufacturer to introduce automix dispensing in both the Garant™ Dispenser and the Pentamix™ Automatic Mixing Unit.

Pentamix™ 3 Automatic Mixing Unit Features for Optimized, More Convenient, Comfortable Handling

- The Pentamix™ 3 Automatic Mixing Unit operates at twice the extrusion speed compared to the Pentamix™ 2 Automatic Mixing Unit. This reduces the tray filling time by half.
- The Pentamix 3 mixing unit can be turned off with the main switch on the front. (Fig. 7)
- Readiness is signaled by the solid green LED. The LED blinks when the device is doing a self-check after turning it on and during operating conditions that do not allow safe clinical use. (Fig. 7)
- The Pentamix 3 mixing unit automatically detects when suitable Penta™ Foil Bags with Penta™ Authentication Label (Fig. 5b) and metal-reinforced cartridges are inserted. The Pentamix 3 mixing unit then operates with optimal mixing parameters.
- After releasing the start button, the Pentamix 3 mixing unit automatically releases the plungers, which can be recognized by the sound of the drive.
- 5:1 systems without Penta Authentication Label and/or non-reinforced metal Penta cartridges cannot be dispensed safely with full extrusion speed. In this case, the Pentamix 3 mixing unit will extrude the materials with the speed of the Pentamix 2.
- The locking lever of the Penta cartridge for the Pentamix 3 can be opened without opening the cover of the Pentamix 3 mixing unit. The mixing tip can be changed more easily. (Fig. 8)
- The lever of the Penta cartridge for Pentamix 3 snaps in to place in the completely opened position to allow easy change of the mixing tip. (Fig. 9)
- Hand wheels as well as start buttons are located on both sides of the device for convenient operation by left- and right-handed people.
- Insertion of the cartridges is simplified because the plungers snap into the uppermost position and the locking lever of the cartridge serves as a convenient handle. (Fig. 10)

Technical Data

Pentamix™ 3 Automatic Mixing Unit	
Main Voltage	100–240 V/47–63 Hz
Power Input	max. 2A
Plunger forward speed	max. 45 mm/min.
Plunger retraction	manual, typically 3 sec.
Mixer shaft speed	380–760 rpm
Rate of dispensing	> 150 ml/min.
Extrusion Force	up to 6.500 N, electronically limited to 10.000 N (+/- 20%)
Weight	9,8 kg
Dimensions	L 283 mm x W 225 mm x H 280 mm

120V power

ThermaKnife™

Hot Tipped Tray Trimming Knife

An effective and time-saving knife for fast and easy trimming of bleaching trays, night guards, mouthguards and other thermoplastic materials.

Featuring an A and B switch, the ThermaKnife has the ability to support two different pens at one time or support a pen and our newly available ThermaPlier. This allows the user to quickly switch back and forth on a trimming job for efficiency and accuracy. Simply choose the pen design that best suits your needs, set your temperature and complete your trimming job with ease. With an adjustable temperature control, you'll always be able to customize the process to your cutting speed and material thickness. Pens and plier can also be interchanged quickly and easily.

Knife-Edge Tip

Concave Tip

Waxing Tip

ThermaPlier™ NEW

Hot Tipped Thermal Pliers

Our new ThermaPlier hot tipped thermal plier attachment is great for reheating the critical areas of dental aligners and tooth positioners without causing adjacent plastic to distort. Fit and form are very important when dealing with aligners, as they function as a guide to proper tooth position, so trust in a tool to get the job done right! It can also be used in orthodontic appliances and mouthguards.

*Optional Accessory

Features/Benefits:

- Fully adjustable temperature control for precise cutting action
- Cutting tip heats ultra-fast to save time and eliminate waiting
- Lightweight pen features an ergonomic design and sharp, permanent tip for improved comfort & control
- A & B Selection switch allows for the use of two different Pens or a Pen and ThermaPlier to reduce time and increase trimming productivity
- Fast and easy pen replacement (via snap connector at back of pen) for added convenience
- Convenient pen rest provides added safety when unit not in use
- Small portable size: Console 5.75" W x 5" D x 4" H (incl. pen rest) Pen: 6" L x .75" W (at foam grip), 2.5 lb total console/pen weight

BD Pyxis™ Enterprise Server

E170 6/6

Flexible enterprise-ready server deployment options

The BD Pyxis™ Enterprise Server provides hospitals and health systems a scalable, flexible foundation for managing BD Pyxis™ ES platform technologies on a single database. This enterprise-ready system provides technology deployment options that can grow with you in size, scope and capacity for years to come. The design increases uptime and minimizes time spent managing redundant data.

Deployment options include:

Software only

BD can install the BD Pyxis™ ES system software on your facility's server or VMware environment. *(Ask your salesperson for details.)*

VMware-ready

BD can deploy a VMware application in your IT environment.

Hardware requirements

- Intel® Xeon CPU E55630 (2.53 GHz) or higher

Windows requirements

- Microsoft® Windows Server 2008 R2/2012 or higher
- Microsoft® SQL Server 2008 R2/2012 or higher

Backup and security

- BD Pyxis™ Security Module or hospital-provided security
- Windows updates are deployed from the BD Pyxis™ Security Module. An optional configuration allows BD-approved Windows updates to be deployed by client IT.
- Depending on deployment option, BD Pyxis™ ES system can be supported by hospital-provided system backup software.

To learn more about BD Pyxis™ platform, BD Pyxis™ Anesthesia Station ES, BD Pyxis™ MedStation™ ES and additional BD Pyxis™ technologies, contact your BD sales representative or visit bd.com

SMART SINK

PHARMA LOCK

Cactus Smart Sink® Controlled Substance Waste Management System

Stryker's Cactus Smart Sink System is designed to safely and easily dispose of controlled substance waste that would otherwise be discarded in red sharps containers, waste bins or down the drain. The Cactus Smart Sink System helps bring your medical facility into compliance by providing proper disposal while simplifying the controlled substance waste management process. It renders the waste non-retrievable and unusable so the remaining portions of controlled substances do not end up in the wrong hands or impact the environment.

Key features:

- 15.5"W x 12.5"H x 9.5"D
- Holds approximately 1.7 liters of solid waste
- Holds approximately 3.0 liters of liquid waste
- "Fast fill" button accommodates waste disposal in large quantities
- Audible and visual alerts notify staff when cartridges become full or expire, or when unit has been accessed
- Includes battery or optional AC power adapter
- Includes security lock and key
- Includes hanging wall bracket

Provide outlet for power option

Installed unit on wall with supplied brackets

DOWNLOAD BROCHURE

Using the Cactus Smart Sink System

The battery powered Cactus Smart Sink System conveniently mounts on a wall or countertop in minutes and can be used anywhere medications are dispensed or administered by healthcare professionals. The innovative controlled substance waste disposal system accepts unused pharmaceuticals in both liquid and solid forms, including patches. It incorporates two types of cartridges, one for liquid waste and one for solid waste. Both cartridges have the ability to render the remaining portions of controlled substance waste into an unrecoverable and unusable form and securely store them until they can be disposed of per regulatory guidelines.

The Cactus Smart Sink System is designed to accept raw liquid pharmaceuticals directly from syringes, vials or IV bags. It also features a one-way funnel that accepts tablets, capsules and patches. The Cactus Smart Sink System includes audible alerts and alert lights to notify staff when the cartridges are full, have expired or when the unit has been accessed. The system cannot be removed from the security bracket without the key and does not accept sharps, vials and/or IV bags.

Applications and installation

Installing your Cactus Smart Sink System is quick and easy!

The Cactus Smart Sink System is completely self-contained and automatic with no complicated buttons or complex instructions. The system can be securely installed in any location where medications are dispensed or administered by healthcare professionals. The unit can be securely fastened on a wall or countertop with the provided bracket and mounting hardware. Automatic alerts will sound when the cartridges are full, have expired or when the unit has been accessed. A low battery warning light will alert staff when battery replacement is required. With normal use, the battery typically lasts twelve months (AC adapters are also available).

Applications and locations include:

Nursing stations, emergency rooms, procedural rooms, pharmacies, near medication dispensing equipment, hospice, surgery centers, doctors offices, veterinary hospitals, nursing homes, container ships, correctional facilities and anywhere medication is administered by healthcare professionals.

☎ Call Customer Service 800.964.5227 »

Would you like to leave us feedback on our product content or images?

Product description

Our non-hazardous pharmaceutical waste containers are developed exclusively to meet state regulations for pharmaceutical waste. White with blue lids, they are easily distinguished from other disposal containers. Available with a leak-resistant gasket and absorbent pad to help contain liquid contents. Locking wall-mounting brackets and floor carts are available allowing for point-of-use placement and one-handed disposal; increases mobility, stability, and security.

- Tamper evident label helps deter tampering during final disposal
- Sturdy, rigid polypropylene construction provides excellent impact and leak resistance (unlike cardboard or fiber) to contain heavy vials, I.V. bags, and more
- Secure, hinged lid with temporary and final closure accepts larger, bulkier waste; closes temporarily between uses; locks for final disposal

AED Plus®

Technical Specifications

Suggested model - exact unit to be selected by the Owner

More than CPR. This Is Real CPR Help®.

Only half of sudden cardiac arrest victims will initially need a shock, but nearly all require high-quality CPR. ZOLL® offers the only AEDs that support rescuers with integrated text, voice, and visual prompts — Real CPR Help®. Its real-time feedback on compression rate and depth helps rescuers administer high-quality CPR.

Smart Investment with a Low Total Cost of Ownership

Longer-lasting batteries and pads require fewer replacement parts, adding up to considerable cost savings over time and rescue readiness in a cardiac arrest emergency.

Intuitive One-piece Electrode Pad Design

Speed is of the essence when treating a victim of sudden cardiac arrest. ZOLL's CPR-D-padz® electrodes feature a unique one-piece, pull-strip design to ensure fast and accurate placement and to minimize the potential of pads being dropped or stuck together.

Designed to be Durable

AEDs are often subjected to rough handling and extreme conditions during an emergency. The ZOLL AED Plus® is highly resistant to dust and moisture and has an ingress protection (IP) rating of 55, among the highest in the industry. It also meets IEC 60825-2; 100G for shock and military (MIL Standard 810F).

Options to Meet Your Preferred Shock Protocol

The ZOLL AED Plus is available in both semi-automatic (shock button manually pressed by rescuer if a shockable rhythm is detected) or fully automatic (AED automatically administers a shock if a shockable rhythm is detected).

Real CPR Help provides unique assistance to rescuers with real-time feedback on CPR compression depth and rate.

ZOLL's one-piece CPR-D-padz electrodes are designed to fit 99% of the population's chest anatomy.

CPR-D-padz offer clear anatomical placement illustrations and a CPR hand positioning landmark.

CPR-D-padz come complete with rescue essentials, including a barrier mask, a razor, scissors, disposable gloves, and a towelette.

AED Plus Specifications

Defibrillator

Protocol: Semi-automatic and Fully Automatic configuration

Waveform: ZOLL Rectilinear Biphasic™

Defibrillator Charge Hold Time: 30 seconds

Energy Selection: Automatic preprogrammed selection

(120J, 150J, 200J)

Patient Safety: All patient connections are electrically isolated

Charge Time: Less than 10 seconds with new batteries

Electrodes: ZOLL CPR-D-padz, Pedi-padz® II or Stat-padz® II

Self-test: Configurable automatic self-test from 1 to 7 days. Default = every 7 days. Monthly full-energy test (200J).

Automatic Self-test Checks: Battery capacity, electrode connection, electrocardiogram and charge/discharge circuits, microprocessor hardware and software, CPR circuitry and CPR-D sensor, and audio circuitry

CPR: Metronome Rate: Variable 60 to 100 CPM

Depth: 3/4" to 3.5"; 1.9 to 8.9 cm

Defibrillation Advisory: Evaluates electrode connection and patient ECG to determine if defibrillation is required

Shockable Rhythms: Ventricular fibrillation with average amplitude >100 microvolts and wide complex ventricular tachycardia with rates greater than 150 BPM for adults, 200 BPM for pediatrics. For ECG Analysis Algorithm sensitivity and specificity, refer to AED Plus Administrator's Guide.

Patient Impedance Measurement

Range: 0 to 300 ohms

Defibrillator: Protected ECG circuitry

Display Format: Optional LCD with moving bar

Size: 2.6" x 1.3"; 6.6 cm x 3.3 cm

Optional ECG Viewing Window: 2.6 seconds

Optional ECG Display Sweep Speed: 25 mm/sec; 1"/sec

Battery Capacity: Typical new (20°C) = 5 years (225 shocks) or 13 hours continuous monitoring. End of life designated by Red X (typical remaining shocks = 9).

Data Recording and Storage: 7 hours of ECG and CPR data. If audio recording option is ordered and enabled, 20 minutes of audio recording, ECG, and CPR data.

PC Minimum Requirements for Configuration and Patient Data Recovery (not compatible with Mac OS): Windows XP, Windows 7, Windows 8, Windows 10, IBM-compatible PII with 16550 UART (or higher) computer. 64MB RAM. VGA monitor or better. CD-ROM drive. IrDA port. 2MB disk space.

Device

Size: (H x W x D) 5.25" x 9.50" x 11.50"; 13.3 cm x 24.1 cm x 29.2 cm

Weight: 6.7 lbs; 3.1 kg

Power: User-replaceable batteries. 10 Type 123A Photo Flash lithium manganese dioxide batteries

Device Classification: Class III and internally powered per EN60601-1

Design Standards: Meets applicable requirements of UL 2601, AAMI DF-39, IEC 601-2-4, EN60601-1, IEC60601-1-2

Environmental

Operating Temperature: 32° to 122°F; 0° to 50°C

Storage Temperature: -22° to 140°F; -30° to 60°C

Humidity: 10 to 95% relative humidity, non-condensing

Vibration: MIL Std. 810F, Min. Helicopter Test

Shock: IEC 68-2-27; 100G

Altitude: -300 to 15,000 ft.; -91 m to 4,573 m

Particle and Water Ingress: IP-55

CPR-D-padz

Shelf Life: 5 years

Conductive Gel: Polymer Hydrogel

Conductive Element: Tin

Packaging: Multilayer foil laminate pouch

Impedance Class: Low

Cable Length: 48 in (1.2 m)

Sternum: Length: 6.1 in (15.5 cm); Width: 5.0 in (12.7 cm); Length, conductive gel: 3.5 in (8.9 cm); Width, conductive gel: 3.5 in (8.9 cm); Area, conductive gel: 12.3 sq in (79.0 sq cm)

Apex: Length: 6.1 in (15.5 cm); Width: 5.6 in (14.1 cm); Length, conductive gel: 3.5 in (8.9 cm); Width, conductive gel: 3.5 in (8.9 cm); Area, conductive gel: 12.3 sq in (79.0 sq cm)

Complete Assembly: Folded length: 7.6 in (19.4 cm); Folded width: 7.0 in (17.8 cm); Folded height: 1.5 in (3.8 cm)

Design Standards: Meets applicable requirements of ANSI/AAMI/ISO DF-39-1993

Porter MXR-D Flush Mount Flowmeter

Package Options:

A

4465CQD-AV Package

- MXR-D Flowmeter
- AVS-5000 w/ Quick Disconnect
- Porter Breathing Circuit
- A-1679 Bag Tee Mount
- 8' O₂ and N₂O DISS-to-DISS Hoses
- Pre-Install Kit

B

4465CQD Package

- MXR-D Flowmeter
- In-Line Vacuum Control
- Porter Breathing Circuit
- A-1679 Bag Tee Mount
- 8' O₂ and N₂O DISS-to-DISS Hoses
- Pre-Install Kit

- The best of both worlds: Analog/Digital combination flowmeter
- Real time flow confirmation with glass flow tubes plus a brightly lit LED screen
- Audible and visual alarms
- Oxygen quick connect conveniently located on the flowmeter faceplate

Dimensions: 12 19/32" x 4 1/4" x 4 5/16"
 Cut-Out Dimensions: 11" x 3 5/8"
 Weight: 8 lbs.

4065D PORTER MXR-D FLOWMETER ONLY (does not include power supply) **\$4,311**

A-4243-000 MXR-D POWER SUPPLY **\$344**

A

4465CQD-AV PORTER MXR-D WITH AUTOMATIC VACUUM SWITCH PACKAGE **\$6,578**

Flowmeter Package includes MXR-D flowmeter, AVS-5000 Vacuum Control, 5155-3AV Breathing circuit, Pre-Install Kit, Bag Tee mount, 8' O₂ and N₂O DISS-to-DISS hoses, and power supply for cabinet installations

4465CQD-AV-LPI **\$ 6,293**

B

4465CQD PORTER MXR-D WITH IN-LINE VACUUM CONTROL PACKAGE **\$6,161**

Package includes: MXR-D flowmeter, 5155-1 Breathing Circuit, Pre-Install Kit, Bag Tee mount, 8' O₂ and N₂O DISS-to-DISS hoses, and power supply for cabinet installations

4465CQD-LPI **\$5,876**

C

B-2460-KIT PRE-INSTALL KIT **\$285**

Includes oxygen and nitrous oxide DISS-piped outlet connections with check valves.

**If ordering in advance of flowmeter packages add LPI (Less Pre-Install) to future flowmeter package order – example: 4465CQD-LPI and deduct \$285 from Retail Price.*

Order Pre-Install Kits to outfit future nitrous operatories.

SEE NEXT PAGE TO SELECT BAG TEE MOUNTING OPTION (NOT INCLUDED IN ABOVE PACKAGES)

Nitrous Oxide Sedation Systems INSTALLATION

ZONE VALVE ASSEMBLY 9000-2 TO WALL SENTINEL MANIFOLD SYSTEM

PORTER

245 TOWNSHIP LINE RD. P.O. BOX 907 HATFIELD, PA 19440-0907 USA [215] 723-4000 / FAX [215] 723-2199

9000-2 INSTALLATION

E181 3/6

E180

1. ZONE VALVE ASSEMBLY
9000-2 IS INSTALLED DOWN-STREAM OF MANIFOLD USING FITTINGS PROVIDED.
2. MODIFY MANIFOLD (4222) TO INSTALL SURFACE JACK (B-1919-000). DISCONNECT WIRES FROM HIGH/LOW PRESSURE SWITCHES AND RECONNECT LEADS FROM SURFACE JACK AS SHOWN. NOTE: ON NEWER MODELS CONNECT TO J4 ON THE O₂ (RIGHT SIDE) AND TO J6 ON THE N₂O (LEFT SIDE).
3. CONNECT SURFACE JACK TO WALL BY ADHESIVE STRIP ON BACK.
4. PLUG IN MODULAR CABLE #5775 TO ZONE VALVE AND SURFACE JACK.
5. FUNCTION TEST SYSTEM BY VARYING PRESSURE AND MONITORING ALARM FUNCTION FOR BOTH N₂O OR O₂ AT HIGH, NORMAL, AND LOW PRESSURE SIGNAL CONDITIONS.

E181

E182

IMPORTANT INFORMATION

NOTES:

- 1) Flush mount zone valve is designed to be installed onto studs located on 16 inch centers with gas supply coming in the top and out the bottom of zone valve.

- 2) Check to insure that:
 - a) Gas supply lines are centered between studs and are on 7 3/8 inch centers.

 - b) Nitrous oxide supply line is 3/8 O.D. tubing and located to the left.

 - c) Oxygen supply line is 1/2 O.D. tubing and located to the right.

 - d) Signal cable is properly routed and length is sufficient to make connection from zone valve to alarm station.

DATE 9/4/86	ECN	DR BG	CH HN	AP	SHT 1 OF 3
PORTER	Parker Hannifin Corporation Porter Instrument Division 245 Township Line Rd. P.O. Box 907 Hatfield, PA 19440-0907 USA (215) 723-4000 / fax (215) 723-5106	INSTALLATION INSTRUCTIONS ZONE VALVE		NUMBER 0055810E	REV.
				FM-389	E

FLUSH MOUNT ZONE VALVE - MODEL 9000-1 AND C9000

INSTALLATION PROCEDURE

1. With black bezel and lexan window removed, position chassis assembly in place. See Figure 1.
2. Check to insure that chassis is level. Nail main chassis to studs using drywall nails (not supplied). See Figure 1.
3. Silver solder (Braz) gas lines in place. Ref. NFPA Gas and Vacuum Systems Code Requirements.
4. Feed signal cable through hole "A" and plug into signal distribution jack. See Figure 1.

FIG. 1

5. System must now be pressure tested per NFPA Gas and Vacuum Systems Code pressure test requirements.
6. Dry wall is now to be installed and painted.

DATE 9/4/86	ECN	DR BG	CH HN	AP	SHT 2 OF 3
PORTER	Parker Hannifin Corporation Porter Instrument Division 245 Township Line Rd. P.O. Box 907 Hatfield, PA 19440-0907 USA (215) 723-4000 / fax (215) 723-5106	INSTALLATION INSTRUCTIONS ZONE VALVE		NUMBER 0055810E	REV.
				FM-389	E

7. Cutting opening: See Figure 2.
 - A) Width to be cut flush with width of fixed (main) Chassis. Approximately 9 in.
 - B) Height to be cut flush with height of fixed (main) Chassis. Approximately 10 1/2 in.
 - C) Use bezel as template to mark location of clearance holes for mounting screws. Drywall wall act as a spacer between chassis and bezel.

FIG. 2

8. Install bezel using 4 flat-head screws provided. Tighten so that bezel sits firm against drywall.
9. Install lexan window. Push in white knobs until they “snap” in place. This will secure window in place. To remove window, pull knobs.
10. Install metal nameplate.

Porter Vanguard Manifold

Model 4222CXB
Manifold System

Porter Instrument Vanguard Manifolds, Zone Valves and Outlet Stations utilize the cross + protection system. The system meets or exceeds the guidelines established by the National Fire Protection Association for Nonflammable Medical Gas Systems, NFPA 99C.

Product Application: Manifold Gas System for Nitrous Oxide and Oxygen for Level II facility.

Porter Vanguard Manifold

Porter Vanguard Wall Alarm Panel

SPECIFICATIONS:

Flow Capacity: Any flow range from 0-100 SLPM (nitrogen) with a pressure drop of no greater than 5 PSIG

Power Requirements: 110Vac

Manifold Features:

- Preset operating regulators for easy switch over
- CGA gas specified inlets and outlets with O-ring seal back up and integral check valves
- High/Low pressure switches preset 20% above and below normal operating pressures
- Manifold complies with NFPA-99C
- Visual indicator of current supply tank
- Automatic changeover to reserve tank with memory of tank usage and empty tank indicator
- Failsafe protection (loss of oxygen supply pressure will shut down Nitrous Oxide supply)
- **Cross + Protection** diameter indexed tubing connections
- Swivel, copper tubing connections to allow easy connection of piping in the up or down configuration
- Pressure relief valves downstream of check valves pre-set at 50% of normal operating pressure
- Audible and visual display indicating normal or high/low system pressure condition
- Normally open electronic control valve that provides continuous gas flow with loss of electrical power.
- Manual over-ride option

OTHER ACCESSORIES

BRACKETS

Wall Mounted Cylinder Brackets

All steel constructed brackets and racks share many high quality construction features. 11-gauge hot rolled steel form the foundation, edges are protected with steel reinforced vinyl edging, guarding maintaining cylinders and providing extra grip; Steel parts are sealed with epoxy-powdered paint to assure long service life and chemical resistance. Straps and cinch-style buckles are chosen as primary means of support because they enable the cylinders to be held tight and secure against the brackets. Support straps are 1 1/2" wide by 54" long polypropylene with steel cinch buckle and rate a robust 1200 PSIG strength. Supports hold cylinders from 4" to 12" diameter.

G 200 Double Cylinder Wall Bracket

G 300 Triple Cylinder Wall Bracket

G 401 Four Cylinder Wall Bracket

STANDS

Model G 181 Single Cylinder Floor Stand

The G 181 safely supports cylinders 4" through 10" in diameter using a cinch buckle, polypropylene strap, 10-gauge steel bar and steel-reinforced vinyl edge guards, similar to our cylinder brackets. This stand is designed and built for the safe storage of industrial and commercial use gas cylinders. It's all welded steel construction is covered with epoxy-powdered paint enhancing its structural integrity, providing for long service life, while safety protecting the cylinders inside.

Item Details

Harris® G200 Double Cylinder Wall Mounted Bracket is made of 11 ga hot rolled steel and has steel reinforced vinyl edge guarding to maintain cylinder and provide extra grip. Bracket steel part is coated with epoxy powder paint for durability and chemical resistance. It measures 24" X 2" X 4" and has strap and clinch style buckets to enable cylinders to be held tight and secure against brackets. It supports 1 1/2" X 54" polypropylene with clinch buckle at the rate of 1200 psig pressure.

Features

- › All steel construction brackets and racks share many quality construction features
- › 11 gauge hot rolled steel form the foundation
- › Edges are protected with steel reinforced vinyl edge guarding to help maintain your cylinders and provide extra grip
- › Steel parts are sealed with epoxy powder paint to assure long service life and chemical resistance
- › Straps and cinch style buckles are chosen as primary means of support as they enable the cylinders to be held tight and secure against the brackets
- › Support straps are 1-1/2" wide by 54" long polypropylene with steel cinch buckle and rate a robust 1200 psig strength
- › Supports hold cylinders from 4" to 12" diameter

Aeras
Ramvac

Aeras® by Ramvac® knows
before you do.

AERAS[®]: MISSION CRITICAL

Your utility room is the heart of your practice. It has to work. It should never disrupt or distract you from improving the lives of your patients.

Having mission-critical data about the health of your compressor or vacuum is essential to your operations.

After all, patients are depending on you.

Aeras Compressor

KNOW BEFORE AT NO CHARGE!

No matter the time, day or night, Aeras by Ramvac gives you the confidence and convenience of knowing if there is preventative maintenance required with your utility equipment. Now, you can mitigate a crisis and work ahead to prevent the inevitable breakdown.

Aeras Vacuum

WHAT'S THAT MEAN FOR YOU?

Powered by an easy-to-use and intuitive dashboard, you will know about potential utility preventative maintenance – anytime, anywhere, so you can be prepared for anything.

With Aeras, you will have one less thing to worry about.

BENEFITS THAT KEEP YOU AHEAD:

EASY SETUP: no wires to install, wifi to connect or apps to download. Equipment connects automatically through cellular and information is accessed through any web browser.

AUTOMATED SCHEDULING: automate daily activation and shutoff. Simply set it and forget it. When treatments run late, the equipment will sense activity and maintain power until the dentist is done.

COMPREHENSIVE DASHBOARD: get a bird's-eye view of a practice's entire back-office operation, including detailed technical outputs, configuration options and service records.

NOTIFICATIONS: you will get alerts and maintenance notifications so you can stay ahead of potential problems.

WARRANTY: we give you more than what you pay for – delivering durability and the industry's longest warranty period, covering all parts up to 6 years.

Your utility room is currently operating out of its normal temperature range.

DENTALEZ

Aeras Compressor

Your office's most expensive instrumentation is powered by air from a compressor, including chairs, handpieces, and the milling station you may be investing in. The health of your patients depends on this air as well.

OUR QUIETEST COMPRESSOR

No need for bulky sound covers, our integrated Sound Shield provides a sound level that is **quiet as a conversation**.

DRY, CLEAN AIR

The dual-desiccant setup shown in figure 2 produces an uninterrupted supply of clean air to power the practice. Air is stored at a **pressure dew point of -40 C, preventing harmful bacteria growth**, and particulates in the air are **filtered to 0.01 microns, trapping most airborne bacteria and microbes**, see chart below.

EFFICIENCY & DURABILITY

The unique rocking-piston design **doubles the life of compression rings compared to standard piston**. The **improved 100% duty cycle design allows for continuous, consistent airflow** even when the practice is operating at full capacity.

FLEXIBLE DUAL-PRESSURE SETTINGS

A pressure toggle switch lets you easily switch between standard (85-115 PSI) and high-pressure (105-125 PSI), so **you can add a milling machine without having to upgrade equipment**.

OSPREY SITE INFORMATION

E187 1/1

PLACEMENT

- Indoor use only, in a dust free room.
- Ventilation required for room to remain between 32° to 100°F (0° to 37.7°C). Forced air & HVAC must be used, in addition, if ambient temperatures do not fall into this range
- Do not install on surfaces with more than a 5° incline.

ELECTRICAL

- It is recommended that this equipment be installed by a licensed electrical contractor only and must comply with local and national electrical codes.
- Install a dedicated electrical circuit of sufficient capacity (See Specification table).
- Any means provided to isolate this device from the supply mains shall isolate all poles simultaneously. The disconnection means and overcurrent protection are to be provided by the installer. This device should always be attached to a dedicated circuit with appropriate wiring and circuit protection.

PLUMBING

- It is recommended that this equipment be installed by a licensed plumbing contractor only and must comply with local and national plumbing codes.
- Connect Drain Hose to fitting on bottom of coalescing filter and direct it into floor drain for disposal of water.
- Connect compressor air outlet to facility plumbing with provided Supply Hose (3/8" mnpt x 3/8" mnpt x 6 ft long).
- Connect Fresh Air Manifold to controlled fresh air source.
- Connect only equipment suitable for listed maximum pressure of the compressor.

Aeras
Ramvac

Aeras® by Ramvac® knows
before you do.

AERAS[®]: MISSION CRITICAL

Your utility room is the heart of your practice. It has to work. It should never disrupt or distract you from improving the lives of your patients.

Having mission-critical data about the health of your compressor or vacuum is essential to your operations.

After all, patients are depending on you.

Aeras Compressor

KNOW BEFORE AT NO CHARGE!

No matter the time, day or night, Aeras by Ramvac gives you the confidence and convenience of knowing if there is preventative maintenance required with your utility equipment. Now, you can mitigate a crisis and work ahead to prevent the inevitable breakdown.

Aeras Vacuum

WHAT'S THAT MEAN FOR YOU?

Powered by an easy-to-use and intuitive dashboard, you will know about potential utility preventative maintenance – anytime, anywhere, so you can be prepared for anything.

With Aeras, you will have one less thing to worry about.

BENEFITS THAT KEEP YOU AHEAD:

EASY SETUP: no wires to install, wifi to connect or apps to download. Equipment connects automatically through cellular and information is accessed through any web browser.

AUTOMATED SCHEDULING: automate daily activation and shutoff. Simply set it and forget it. When treatments run late, the equipment will sense activity and maintain power until the dentist is done.

COMPREHENSIVE DASHBOARD: get a bird's-eye view of a practice's entire back-office operation, including detailed technical outputs, configuration options and service records.

NOTIFICATIONS: you will get alerts and maintenance notifications so you can stay ahead of potential problems.

WARRANTY: we give you more than what you pay for – delivering durability and the industry's longest warranty period, covering all parts up to 6 years.
