Owner Background

Southcentral Foundation (SCF) is an Alaska Native-owned healthcare organization serving an estimated 56,146 Alaska Native and American Indian people living in Anchorage, the Matanuska-Susitna Valley, and 60 rural villages in the Anchorage Service Unit (ASU). SCF's first P.L. 638 contract with the Alaska Area Native Health Service began in 1984 to provide dentistry, optometry, community health representatives and injury control services. Substance abuse treatment was added in 1987.

In 1998, SCF assumed ownership and management of the Anchorage Native Primary Care Center, which serves the entire Native population of the state - an estimated 130,682 people. In January 1999, SCF and the Alaska Native Tribal Health Consortium signed an agreement to take over management of the Alaska Native Medical Center from the Indian Health Service. With this transition, Alaska became the first state in the nation to have all its health facilities for Native Americans managed by Native organizations.

Project Team Members

SCF will hold the construction contracts for the project.

The project scope includes coordination with SCF's Staff through SCF's Project Manager. The Contractor is also responsible for project closeout including the provisions of Operations and Maintenance Manuals and assignment of written warranties and guarantees as required in the contract.

The SCF Project Manager will issue and evaluate all bids responding to this Invitation to Bid (ITB), negotiate a contract with the successful Bidder in coordination with the SCF Contracts Department, and administer the planning and construction of the project.

This Invitation to Bid (ITB) invites Bidders to respond to a fixed set of criteria for the project and a Stipulated Price contract form. Within the framework of this ITB, the SCF Project Manager will review bids to assess each Bidder's submitted price and capabilities to deliver a quality and efficient project that is the most advantageous to the owner. This set of qualifications described in detail in this ITB, will be considered a baseline by which submitted bids will be evaluated.

Summary of Work

The Igiugig Clinic is roughly 15 years old in good condition, we'd like to make the following improvements this year.

1. Painting of: SCF to approve color
 - Soffits
 - Exposed glulam beams– Clinic exterior
 - Posts and brackets at front entry
2. Remove rust and paint 10 parking bollards – SCF to approve color
3. Modify a section of each steel column and reweld.
 - The front canopy at clinic entrance appears to be out of level to a small degree, likely due to frost heaving of the soils below. The supporting column was designed to allow for some adjustability, however, the adjustable portion has been completely maxed out, limiting the amount of remaining adjustment possible. Remove a small section of column just below the brackets and reweld
4. Install a new vapor barrier in the crawl space
 - The clinic's crawl space is littered with old building material, the vapor barrier appears damaged, unsecured and isn't continuous.
 - Organize materials
5. Install moisture sensor, controls, and exhaust fan in crawlspace
 - The crawlspace vent appears to have been covered up, there is moisture on the ground in more than one place. An automatic ventilation system is needed to keep moisture from building up in this space.
6. Install/place gravel around back of the clinic
 - Selected vendor to source gravels locally,
 - See contact sheet
 - Fuel line at the ground is currently suspended just above ground, this is due to years of water runoff from the clinic roof.
 - Installing gravel at the clinic footings will discourage water from traveling toward the clinic footings and crawlspace while providing proper support for the ground mounted fuel line.
7. Repair/seal roof leak at roof top vent and replace damaged plenum ceiling tiles
 - Water is leaking in and down to the plenum ceiling tile(s), plenum tile staining can be seen from the clinic circulation/hallway
8. Replace front door hardware
 - It appears that door hardware may have been damaged at some point and no longer close properly on its own.
9. Repair siding where needed with materials on hand. OF/CI
 - Siding materials left over from clinic construction is staged in the crawl space, there should be enough siding materials to make repairs.
 - We will inventory siding on site to determine if there is enough to make needed repairs.
10. Increase in-clinic water filtration by Installing 2 new water filters.
 - The clinic currently has 2 water filters plumbed into the water supply line.
 - Plumb in 2 more water filters so that the clinic can switch between each pair of filters.

11. ***Add Alternative #1** Supply and install 2 mini split A/C units: 1 unit to provide cooling for the office and Pharmacy, and the 2nd unit to provide cooling for communications closet and lobby. Assess clinic electric system capacity for creation of dedicated circuits to power outdoor units.

- Equipment:
 - 2- Daikin condensing unit model: 3MXS24RMVJUA
 - 4 - Daikin evaporator unit model CTXS07LVJU
- Scope of Work
 - Provide ductless mini-split units and appurtenances to serve Office, Server Room, & Pharmacy
 - Build Unistrut mounts for outdoor condensing unit
 - Mount indoor evaporator units
 - Install refrigerant line-sets
 - Pressure test, evacuate, and charge refrigerant
 - System startup & testing
 - Installation of dedicated electrical circuits, and AC Units

Assumptions:

1. Contractor to provide their own housing – See contact sheet
2. Contractor to provide their own local transportation – See contact sheet
3. Add Alternate #1. Mini-split AC unit installation for pharmacy must be coordinated with local medical provider.
 - a. We will, as a group determine clinic electrical system capacity for creating dedicated circuits to power to 2 mini-split AC condenser units. All bidders will be present during this capacity determination.
4. Crawlspace work to include organization & cleaning, vapor barrier removal and new vapor barrier installation, installation of a moisture sensing ventilation system. This work can occur during clinic hours if it is not disruptive to clinic operations
5. Contractor to remove unwanted project materials and project trash.
 - a. Contractor to inform local authority of dump usage
